FIRST AID ACCESSORIES

DUCT TAPE

size:

5CM*2.5M

MATERIAL:PE

**Mainly used for wound
and splint fixation**

SPLINT

size:

11*46CM 11*61CM

11*91CM 15*92CM

**Made of lightweight and malleable
foam padded aluminum**

**The splint is exceptionally pliable
and when bent into a simple curve,
it becomes strong and supportive
for any fractured or injured limb.**

BLACK OXIDE FINISH SCISSORS

size:
19CM

Made of stainless steel and ABS plastic
Anti-rust oxide coating on the surface
the scissors
Snap-on scissor handles allow scissors
to be hung on bag

TRIANGULAR BANDAGE

size:
36"*36"*51"

With 2 pcs pins
Made of 100% cotton
Mainly used for wound
and splint fixation

**ELATIC CREPE
BANDAGE**

size:

- | | |
|-----------|------------|
| 5CM*4.5M | 7.5CM*4.5M |
| 10CM*4.5M | 15CM*4.5M |
| 20CM*4.5M | |

Made of cotton and spandex
Breathable, tear resistant and durable
Mainly used in emergencies, disasters
and pre-hospital first aid.

ELASTIC BANDAGE

size:

- | | |
|-----------|------------|
| 5CM*4.5M | 7.5CM*4.5M |
| 10CM*4.5M | 15CM*4.5M |
| 20CM*4.5M | |

High-elastic bandage, featuring
excellent elasticity and stretch.
Equipped with an adjustable buckle
for easier and more convenient
application and care. Reusable
and easy to maintain.

CHEST SEAL

square size:
15*15cm

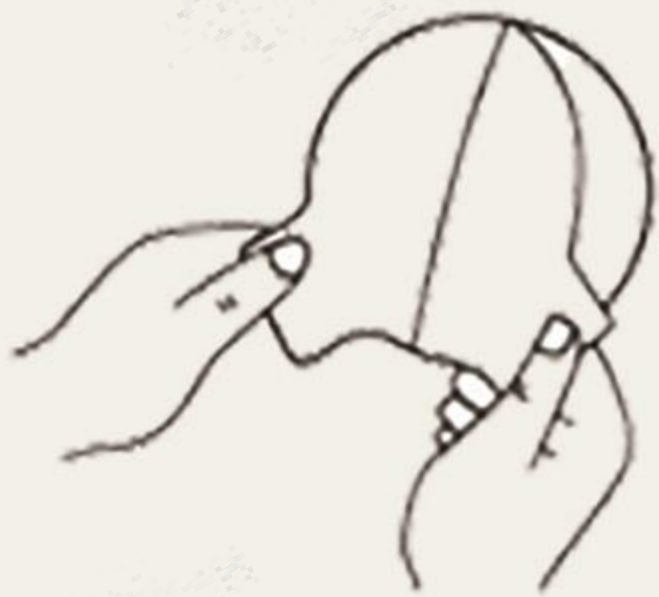

Made of hydrogel dressing and latex free
Prevent wound infection and relieve
pneumothorax

USE AS FOLLOWS:

1.Wipe away blood round the chest wound.

CAT TOURNIQUET

size:

3.8CM*95CM nylon rod

Made of total nylon material

**Quickly controls life-threatening
extremity bleeding**

**Provide true circumferential
pressure**

CAT TOURNIQUET

size:

3.8CM*95CM metal rod

**Made of high-quality nylon and
aluminum rod**

**Quickly controls life-threatening
extremity bleeding**

**Apply constant pressure to the
wound to stop the bleeding**

DECOMPRESSION NEEDLE

Material: 304 Stainless Steel + PVC

Specification: 14Ga * 3.25 in

Weight: 14 g

Size:

Hard plastic shell size: 14.2 cm × 1.2 cm (diameter)

Needle length: approx. 10 cm

Soft tube length: 8.3 cm

Item List: Soft Tube + Decompression Needle + Carrying Case

Application Scenarios:

Camping and outdoor adventures + Emergency rescue operations + Disaster preparedness and survival supplies

EMERGENCY BANDAGE

size:

4" width 10CM

6" width 15CM

customizable

Elasticated bandage with a sterile pad

Double bagged packaging for extra protection

Provide immediate direct pressure to the wound

HAEMOSTATIC GAUZE (KAOLIN)

size:
7.5*370CM

Made of 100% non-woven fabric
Used to compress the wound surface
to stop bleeding or pack large wounds
Gauze needs to be removed before
treating the wound

ALUMINUM EYE SHIELD

size:
6*8CM

Made of high quality
aluminum alloy
Protect eyes from secondary
damage

ABDOMIND EMERGENCY BANDAGE

size:

8" PAD: 30*30cm

6" PAD: 20*19cm

**Widened elastic bandages better
fit abdominal trauma**

**Supplied with sterilized tablets,
in sterilized packaging**

**Used for military or emergency
treatment of major trauma**

COMPRESSED GAUZE

size:

4.5"*4.1Y

**Been designed in rugged sterile,
compact packaging**

**Vacuum sealed for maximum
portability**

**Easy-open package for quick
access for wound packing**

HEMOSTATIC GAUZE

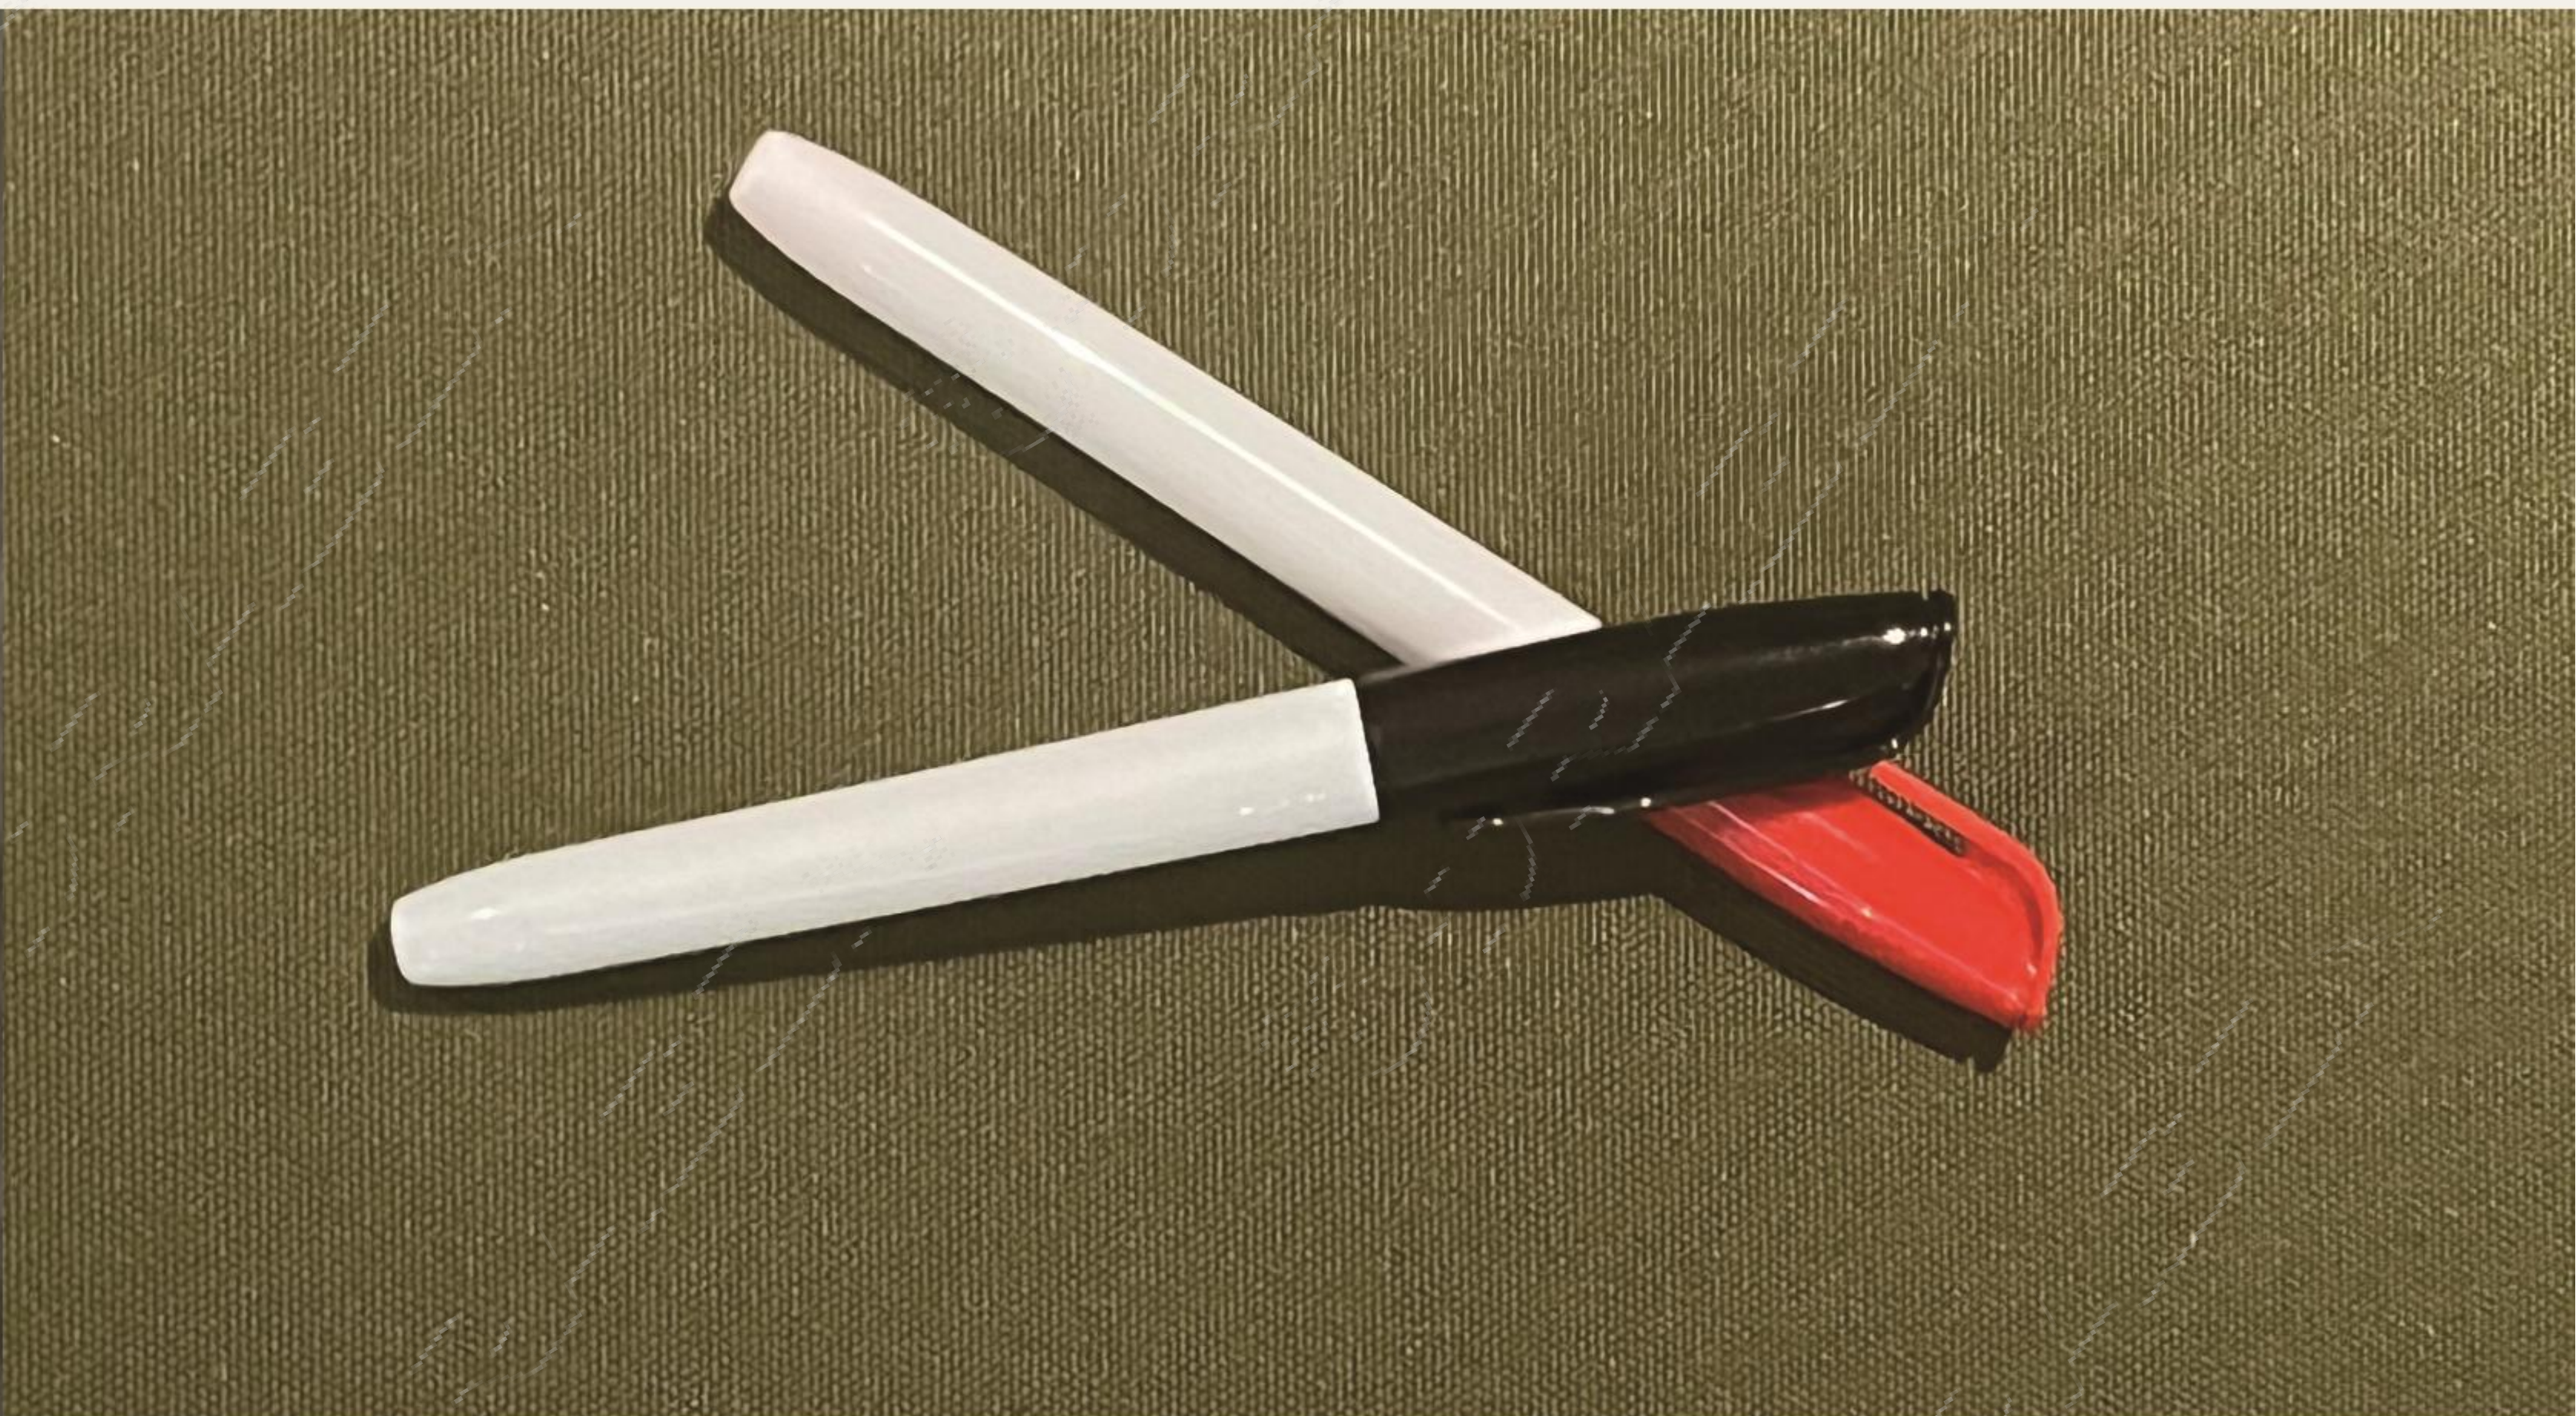

size:

7.5CM*180CM 7.5CM*300CM

7.5CM*150CM

Composed of 100%
chitosan ingredients
For the rapid control of moderate
to severe bleeding and management
of abrasions, lacerations, contusions,
puncture wounds and burns.

MARKPEN

size:

14CM

Portable, smooth-use high-quality
markpen
Used to record rescue time or
casualty information

BURN DRESSING

size:

Dressing: 10*10cm, 20*20cm, 30*40cm, etc.

Spray: 50ml, 120ml

Bottle: 59ml, 118ml

Tube: 25g, 50g

Gel: 3.5g

Non-adhesive and easy to remove without further trauma

Can be used to treat all burns immediately

Can absorb heat and provide relief

FOLDAWAY STRETCHER

DW-F006M

size:220x55x15cm

- *Flexible handle and foldable outrigger
- *Made of high strength aluminum alloy material and oxford leather materials.
- *Being light-weighted, portable, and easy-carried
- *Mainly used in battle field and outdoor to carry patients and wounded person.

FOLDAWAY STRETCHER

DW-F010

size:220x55x15cm

- *Flexible handle and foldable outrigger
- *Made of high strength aluminum alloy material and oxford leather materials.
- *Being light-weighted, portable, and easy-carried.
- *Mainly used in battle field and outdoor to carry patients and wounded person.

SCOOP STRETCHER DW-SC003

Size:(202-168)*44*8cm
Fold:120*44*9cm

Made of high-strength aluminum alloy materials.
A separately-type stretcher to transfer fractured and serious patients.

- *A hinged and joined arrangement, which is easy to set the stretcher into two parts, is set in the middle at both ends of the stretcher. Strengthen the patients at original place to reduce the further hurt of the patients
- Put the patients in the stretcher quickly & easily.
- *Can be taken out from the back of the patient without moving the patient
- Adjust the length according to patients' body.
- Anarrow-frame foot structure.
- *Light-weighted,small-sized, easy-carried, use-safely and easy for sterilization and clean.

PE SCOOP STRETCHER DW-SC004

Size:(232-160)*44.5*7cm
Fold:117*44.5*7cm

- Detachable design to transfer fractured and serious patients.
- One hinge device is set in each end of the stretcher used to divide main frame into two pieces.
- Strengthen the patients at original place the further hurt of the patients.
- Without moving the patientthe operators can draw out the stretcher very easily.
- Adjustable length according to patients'body.
- Equipped with a narrow frame structure of foot.
- Patients won't feel too hot or too cold on thermally-treated polymer surface.
- The surface is easy to clean and impervious to fluids.

CARBON FIBER SCOOP STRETCHER DW-SC006

Size:1637x437x67mm

Fold:1157x437x67mm

The two main characteristics of carbon fiber are strength and light weight. Carbon fiber has a specific gravity of about 1.8, and carbon fiber is also 2.7 times lighter than aluminum. In addition, carbon fiber has excellent strength and rigidity, broken fiber is about 1 times higher than aluminum alloy rigidity, strength is more than 3 times, carbon fiber also has a variety of other characteristics, such as not due to fatigue failure, no rust, chemical and thermal stability is good. It is a highly reliable material with long-term stability in its properties, even under harsh conditions. Suitable for use in a variety of harsh environments.

FOLDING BED DW-ST099-1

size:

1960*660*440mm

Material:Aluminum alloy

Fabric:600D oxford;

Weight capacity:150kg

FOLDAWAY STRETCHER

DW-F007T

size:229*55*16cm

Fold:53*24*23cm

Material:Textilene

when folded, it is enough to fit your back, while not protruding above shoulder level.

Light weight, so will not slow you down in battle.- Foldable design is easy for transportation and storage

SLEEPING BAG

size:210*70*40cm

Shelling+Lining:

190T Polyester Waterproof

Filling:100% Polyester

CAMOUFLAGE CLOTHING

Fabric material: TC 80/20
180gsm Polar fleece
waterproof, moisture breathable
and warm

The waterproof surface of the cloth is like a lotus effect. There is a protruding brim just above the mouth of the hat. In addition to the shading effect like the brim of mountain bike half helmet, it is more useful to prevent the rain from flowing down the forehead in rainy days, which obviously obstructs the vision. The upper layers of the shoulder area and the middle part of the hood, in addition to the typical reinforcing overlays, are made of a cape blended fabric, which increases the durability and the resistance of these areas to getting wet.
