

M300 Bluetooth hearing protector

EARMOR® M300T is noise-canceling headset designed to provide users with safe and reliable hearing protection. Equipped with an integrated chip that utilizes advanced digital signal processing technology, it effectively reduces noise in noisy environments and minimizes the damage caused by gunshot noise to hearing. Built-in Bluetooth functionality in the chip, M300T allows you freely listen to music and answer/reject calls even in a noise-canceling mode. Additionally, the optimized pick-up function enables clear perception of ambient sounds, maintaining excellent communication abilities. Three pickup modes can enhance your situational awareness across the board. The multi-layered headband design prioritizes comfort during wear. Its lightweight design significantly reduces pressure on the head and enhances portability.

- Slim

Its slim body design enhances visual aesthetics.

- Multi-layered Structure Design

The headband design, featuring comfortable sponge, breathable mesh, and premium leather, is crafted to enhance your wearing comfort.

■ DIY area

The prominent area of the headband features a refined hook and loop fabric, allowing you to affix personalized labels with ease, showcasing your unique style.

■ Fits different head sizes

Features a compact folding design for easy portability. Comfortable headband and adjustable bracket make it adaptable to different head shapes.

■ Multiple pickup modes

Three unique pickup modes have been designed to address the changing needs of the environment, ensuring a superior listening experience in a variety of scenarios.

Ambient mode

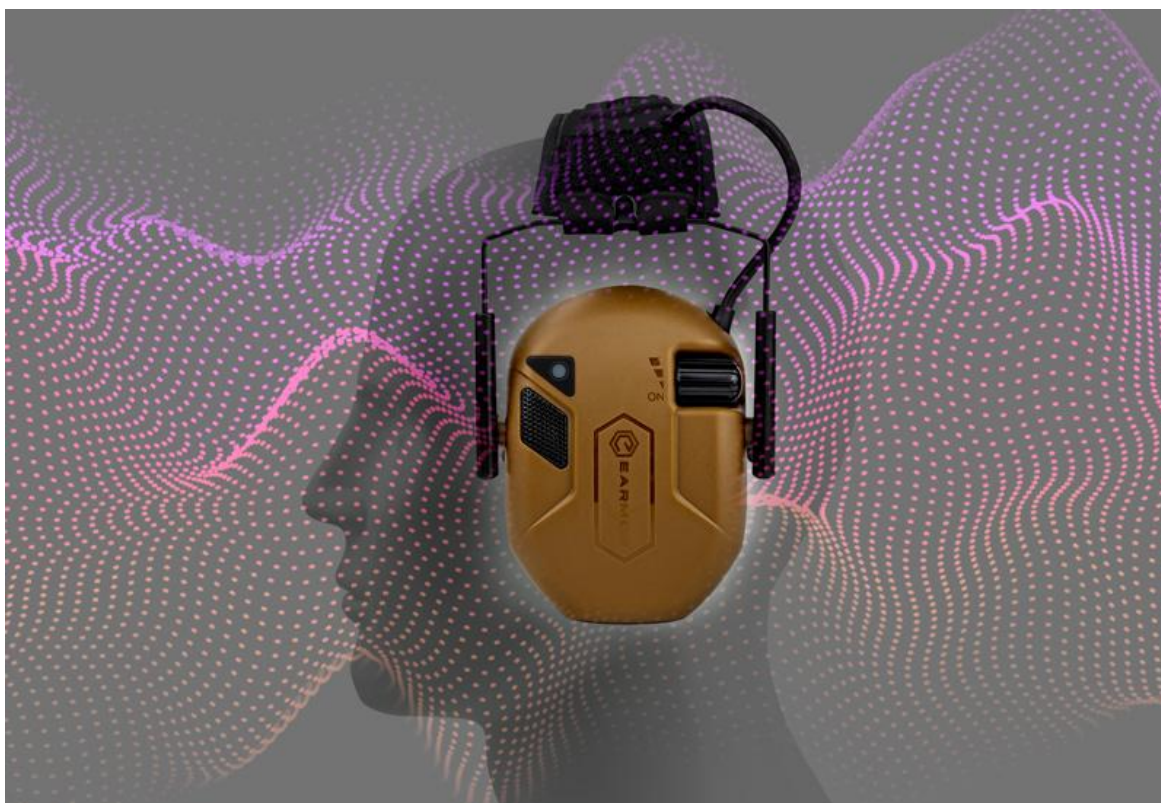

Clear voice

Focus mode

- Capture every detail with clarity and enhance your situational awareness across the board.

- Hearing protection

Rapid activation of the wave suppression function in less than 1 millisecond suppresses harmful noise by more than 82 dB, protecting your hearing while maintaining a clear listening experience.

■ Integrated control

The infinitely variable knob design integrates on/off switching and volume control for fast response and seamless execution.

■ Music control

Bluetooth connectivity allows you to easily manage music playback, pause or switch tracks with one-touch operation, completely freeing your hands from the distraction of operating your cell phone.

■ Call handling

Bluetooth connects to your cell phone, making it easy to answer, hang up or reject calls with a single button, putting call control at your fingertips.

Multi-function button

- Bluetooth 5.4 technology
- Rotary control switch and volume
- Ergonomic design
- NRR: 22dB
- Amplify ambient sound
- Suppress noises exceeding 82dB
- Sealing ear pads
- Voice tracking system for clear communication
- Foldable for easy storage
- IPX5 waterproof
- 2 x AAA batteries
- Auto shutdown of 4 hours of inactivity

■ **Optional:**

Color:

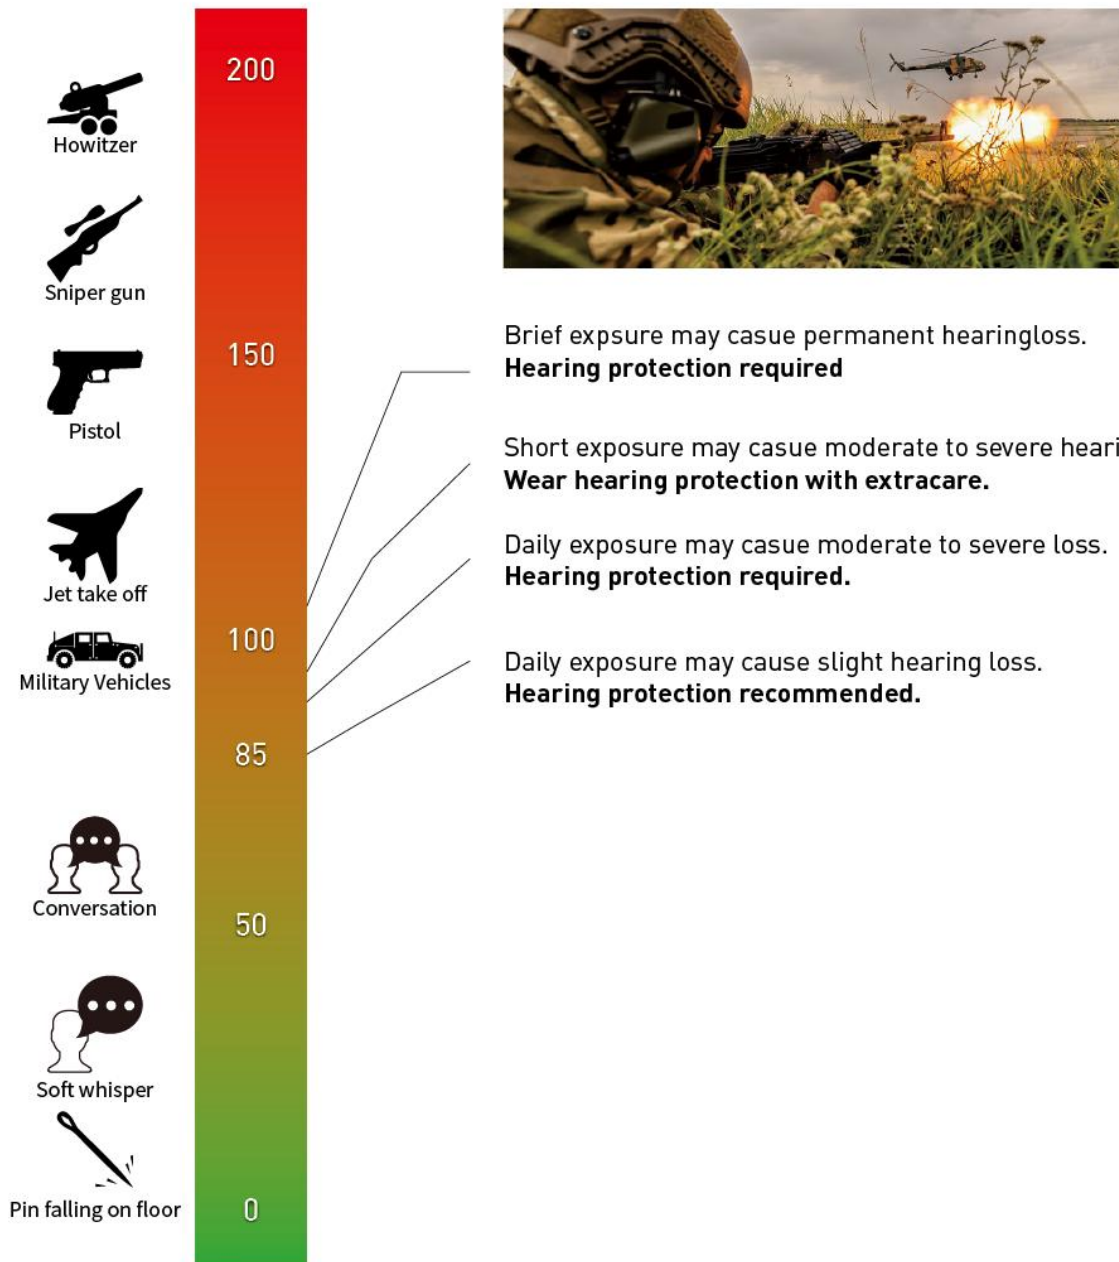

Coyote Brown

Foliage Green

Tactical Black

■ Need to know the protection:

Always wear hearing protection in a noisy environment, otherwise noise may cause hearing damage.

■ APPROVALS

EARMOR® M300T Headset Attenuation data, American National Standards Institute specifications:

ANSI S3.19-1974

TEST FREQ.(HZ)	125	250	500	1000	2000	3150	4000	6300	8000	NRR

■ Specifications:

Product Specifications	Model/Specification	Parameter
Pick-up Characteristics	Activation Noise Reduction Level	≈95dB
	Noise Reduction Value	22dB
	Microphone Sensitivity	-32dB±2dB
	Pick-up Pattern	Omnidirectiona
Speaker and Microphone Components	Speaker	Dynamic Coil
	Speaker Impedance	32Ω
	Speaker Size	30mm
	Speaker Rated Power	≈30mW
	Speaker Frequency Response Range	20Hz-20KHz
Working Time	Working Time	60 hours
	Operating Temperature Range	-20~60°C
	Storage Temperature Range	-40~70°C (Use after returning to operational temperature)
Power Source	2 x AAA Batteries	
Materials	ABS+Leather+Metal	
Net Weigh	339g±10g	
Earpad material	Gel	

WARNING

Hearing protector

Hearing protection is designed to reduce the harm caused by harmful noise or other treble.

Improper use or improper wearing can cause hearing damage in strong noise.

In order to use hearing protection headphones properly, you can consult a professional and read the instructions carefully or call our company for more details. Please do not wear headphones if the ear is ill, or improper protection will cause permanent hearing loss.
