MKU[®]
EMPOWERING HEROES

“As we continuously embark on our quest to empower heroes and shape our future, we invite you to join us on a mission to create a safer world for the generations to come.”

MR. MANOJ GUPTA
Chairman, MKU Ltd.

MKU is a global defence and homeland security company. We empower heroes to safeguard the future for generations to come. We do this by developing smart solutions which give our heroes the confidence they need in any challenging situations.

Our rich experience and deep understanding of the requirements and challenges faced by heroes in the line of duty, coupled with extensive R&D capabilities, give us the expertise and authority to successfully design, develop, and deliver solutions that empower our heroes.

3 DECADES OF EMPOWERING

EMPOWERED

OUR LOGO DEFINES US:

WE BELIEVE IN EMPOWERMENT

We are represented by the letter 'M' in our logo as the enabling body that empowers heroes. The letter 'M' embodies the solid foundation of empowerment that the MKU team is built upon and strongly believes in.

WE DELIVER CONFIDENCE

Our smart solutions are represented by the letter 'K' in our logo. It embodies the power of knowledge and innovation that help us create combat-proven smart solutions by applying our core philosophy of smart trinity, i.e., smart technology, smart functionality, and smart design.

WE ARE FOCUSED ON U

We are about our heroes, our people, our team, and our partners. They are at the core of what we do. We develop smart solutions for soldiers and platforms with the intention to provide an edge to our heroes in challenging situations, an edge that instills confidence in them.

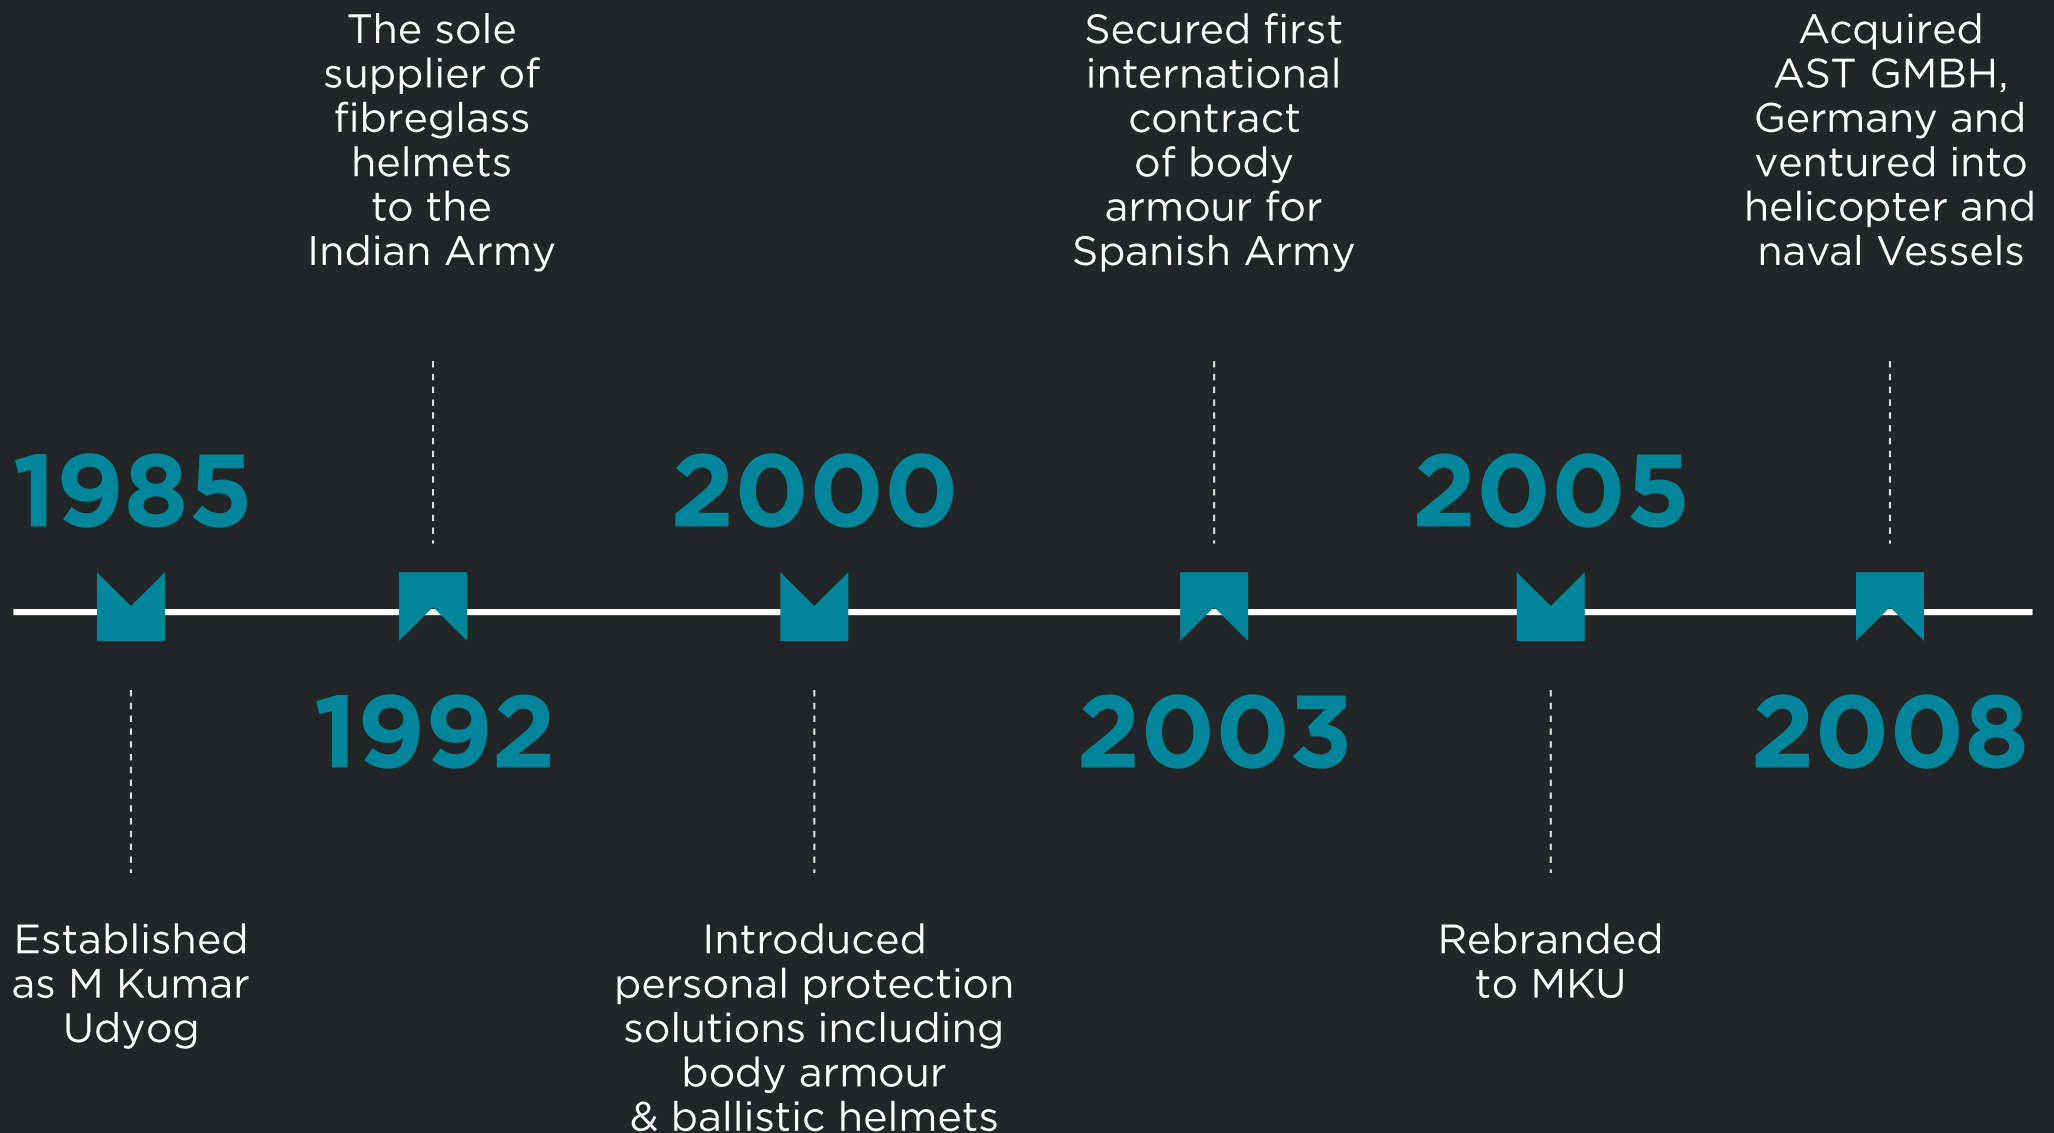

MKU emphasises on maintaining a close interface with its end customers.

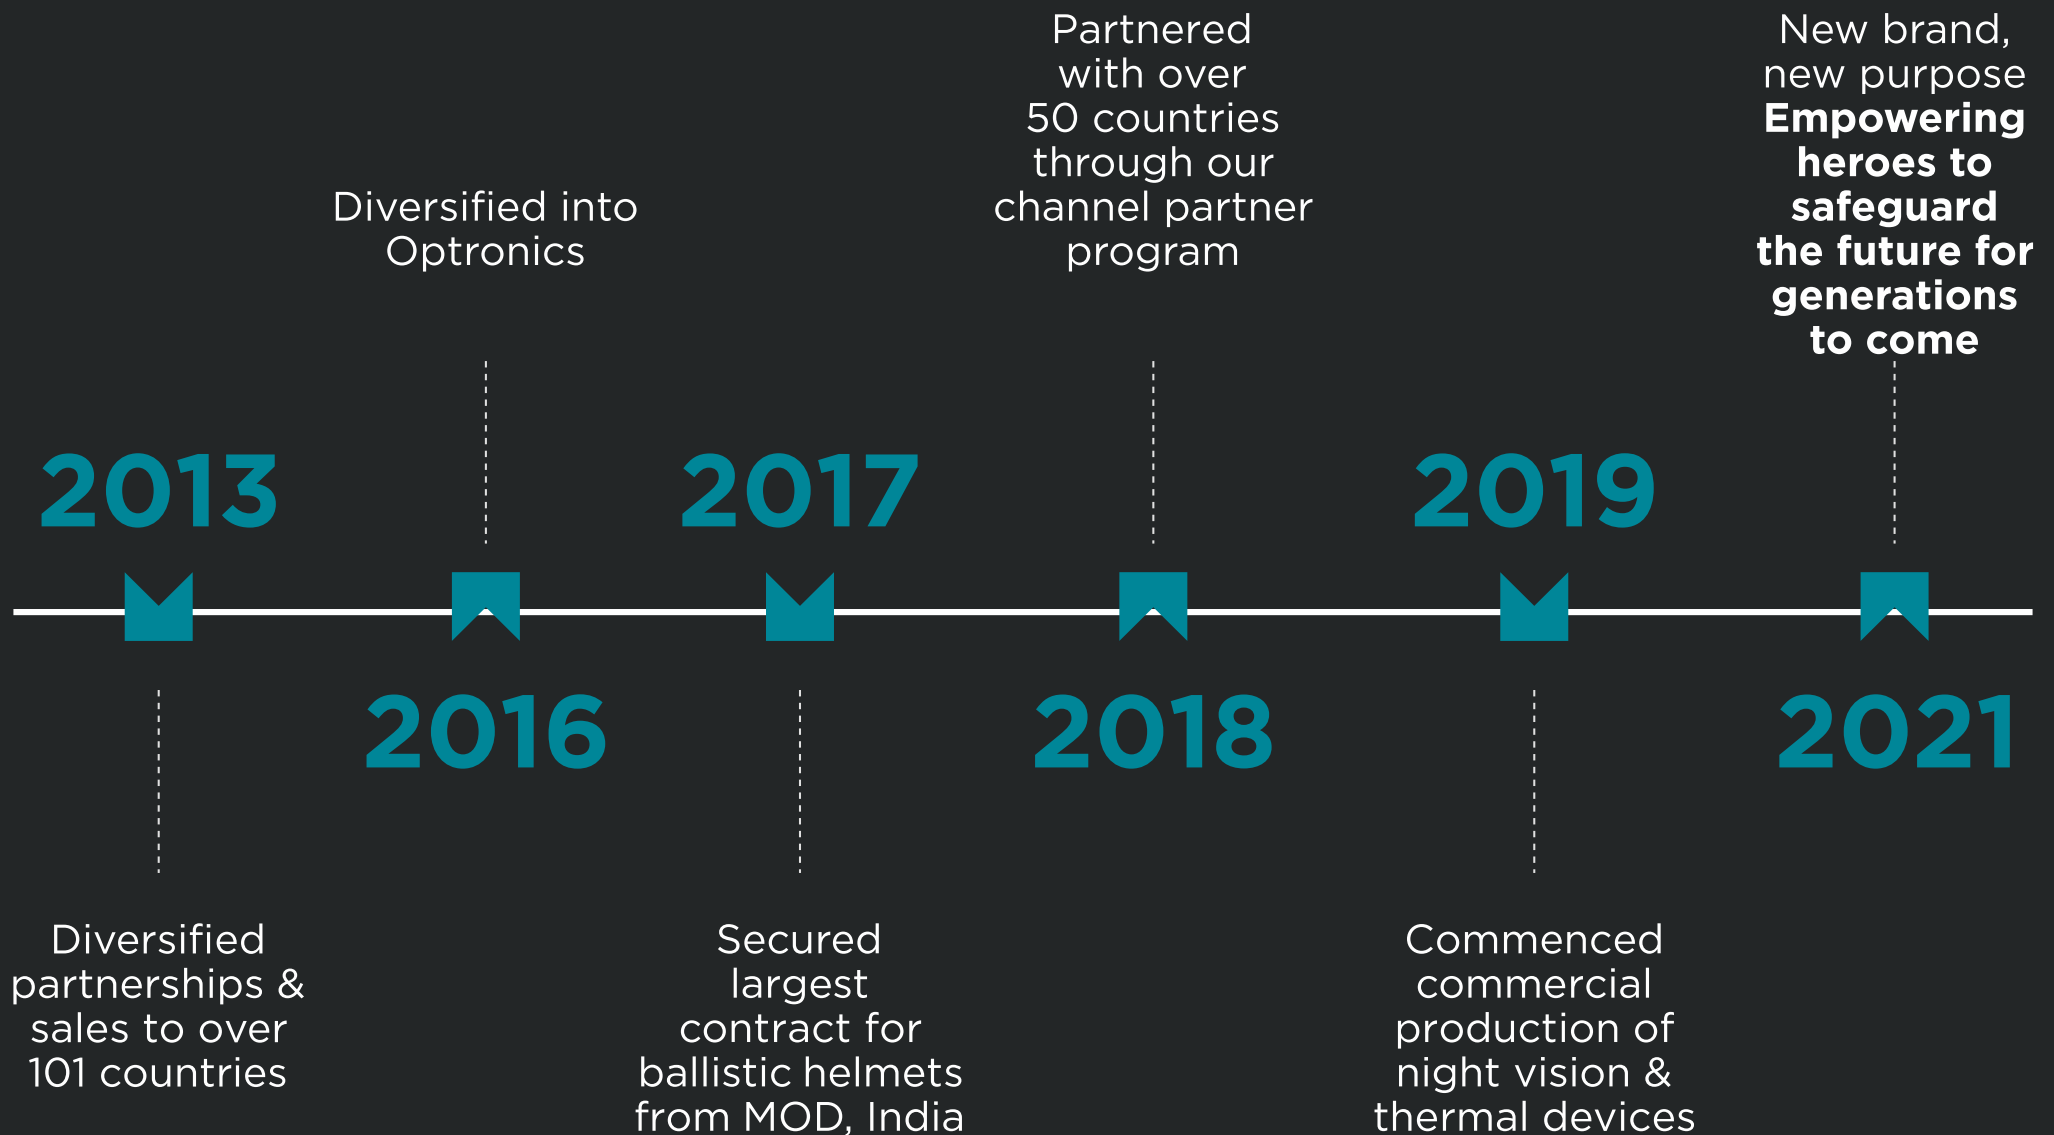

MKU has an extensive network of prominent and versatile partners across the world to work closely with us to service the requirements of our end customer.

Mbrace is a structured channel partner program that seeks out alliances with business partners in new and unrepresented areas and territories.

OUR SMART TRINITY

Smart Trinity is the amalgamation of smart functionality, smart design, and smart technology. It forms the foundation on which all our solutions are designed, developed and delivered to our heroes.

OUR SMART SOLUTIONS

Kavro's cutting edge soldier protection solutions stand firmly between our heroes and the bullet, no matter where they are and what bullet they face.

We manufacture smart personal protection solutions which deliver multi-threat protection. Our range of solutions include Ballistic Helmets, Body Armour, and Ballistic Shields and Blankets. These solutions are tested and certified by leading laboratories and organisations across the world.

We turn night into day for our heroes with our range of optronics solutions so that they can operate with confidence in challenging situations, no matter how dark their surroundings are.

Netro optronic devices are built with a robust combination of smart optics and electronics to ensure that they exceed expectations in performance. They incorporate the perfect blend of smart features, design and functionalities to deliver enhanced performance and versatility.

We develop smart platform protection solutions for air, naval and land platforms using patented technologies and systems developed with years of research and development.

We offer end-to-end solutions from design, development, manufacturing and integration of light weight composite armour for platforms and vehicles. We are certified as per Aerospace Standard AS 9100:2009 and follow EN 9100 quality procedures.

Our optronic solutions for platforms are designed to enhance the operating efficiency of the crews operating or manning the platform at night or in pitch dark conditions. Rugged and dependable, these solutions integrate seamlessly with the platforms they are developed for.

They deploy the most advanced sensor technologies, optics and smart design principles to offer excellent performance and dependability.

We develop software powered smart platform intelligence solutions that give you the 'power to stay in control' and be 'response ready' with real-time information and analytics to resolve uncertainties in the field. These solutions deploy a gamut of intelligent technologies and cloud computing to deliver accurate and timely information. AUTRO Intelligence solutions are designed for scalability and backed with full support by our team of expert professionals.

NETRO TD-5100 DRIVER NIGHT SIGHT FOR T-90 TANKS

Netro TD-5100 Driver Night Sight is designed for T-90 tanks and uses a fusion of thermal and day optic technologies to deliver an extremely smart solution for efficient operability and maneuverability, at night and in pitch dark, to tank operators. It offers enhanced depth perception, situational awareness, and detection ranges. This driver night sight is also ideal for use with all T series tanks, BMPs, and other armoured vehicles.

KAVRO ACH-1038 T PROTECTION FROM RIFLE ROUNDS

This revolutionary ballistic helmet, powered by Macromatrix technology, provides NIJ Level III protection from high energy rifle rounds. It can take up to 5 shots of high energy rifle rounds at muzzle velocity on the front, back, either side, and crown respectively, with resulting back face deformation of less than 25mm. It can resist rifle ammunitions 7.62 x 39 mm, M80, NATO ball, and AK 47 MSC.

KAVRO TAC-I IIA+ BODY ARMOUR SYSTEM WITH EXO AND BACK-PACK

Tactical body armour features a smart integrated 30 L backpack system for quick attachment and release of the bag and an upper body exo to redistribute carried load, considerably enhances the agility and deftness of a soldier in every situation. It provides NIJ Level III+ (0101.06) protection and features the Kavro quick release system.

BALLISTIC GLASS
RPG PROTECTION
IED PROTECTION
MINE PROTECTION

PLATFORM INTELLIGENCE

AUTRO's smart intelligence solutions give you the 'Power to stay in control' and be 'Response Ready' with real-time information and analytics.

FLEET CONTROL SOLUTIONS

Powered by Informatics, Real-time data & Video Telematics, our proven Smart Fleet Control Solutions empower forces to deploy and manage fleet-dependent missions with maximum efficiency and full control, regardless of network accessibility. These solutions can be configured as per mission requirements, enabling quicker decisions in tactical situations with features like Live Asset Tracking, Automated Reports and Violation Alerts, Driver Behaviour and Scorecard as well as a Panic Button.

SALIENT FEATURES:

- Real time geo-visibility, monitoring and deployment
- GeoFencing and Route optimization
- Accessing Driver Facing or Road Facing events for action or evidence
- Panic Button
- Avoid Physical Shutdowns and provide key maintenance and analysis.

SMART INFRASTRUCTURE THAT INSPIRES

We empower heroes through 4 manufacturing facilities spread over 400,000 sq. ft. between India and Germany which employ over 500 people.

They are equipped with the most modern plant and machinery including clean rooms, electronic and optics development, testing and assembly infrastructure that complies to MIL standards for Optronics and laser cutters, automatic cutting & stitching machines, large heavy duty presses and water jet machines for armouring solutions.

INNOVATION IS AT THE CORE OF WHAT WE DO

Over 60 engineers work non-stop at the MKU Technical Centre which is recognised as a research and development facility by the Ministry of Science and Technology, Govt. Of India for military grade technology and applications.

We have developed and patented over 20 new technologies and solutions, recognised all over the world that are continuously empowering our heroes across the globe.

POWERED BY PARTNERSHIPS

We are long-term partners with Thales, France, DRDO, India and other leading organisations and work on various co-development projects for co-development of Optronics and Armour products and solutions.

IN-HOUSE TESTING, LABORATORIES & DESIGN CENTRE

We have in-house sensor testing labs, a world class ballistic testing lab which conforms to the most stringent specifications specified by NIJ 0101.06, STANAG 4569 and NIJ 0108.01, to sophisticated environmental and performance testing labs for both optronics and armour solutions, and an in-house design centre.

CERTIFIED SOLUTIONS AND QUALITY MANAGEMENT SYSTEMS

We follow the **NATO AQAP standards** and our facilities are certified

- **ISO 9001: 2015**
- **ISO 14001:2015**
- **En9100**
- **OHSAS 18001**
- **BA 9000**

NIJ 0101.06 Certified Solutions

Our armour solutions are certified for performance as per the NIJ 0101.06 standard specified by the National Institute of Justice, USA which is one of the most stringent and toughest certification in the world and purports lifecycle compliance of the armour at all the stages of its entire service life.

**Empowering heroes to safeguard
the future for generations to come.**
