 - great

V-great International Limited is a professional company specialized in design, production and supply of the most advanced safety solutions for law-enforcement industry as well as other entities concerned about their personnel safety.

Our products are not only widely recognized by civil testing organizations, but also authoritative international testing agency. "High quality, competitive price and fast delivery" is our guarantee for our products. V-great is the first Chinese company whose name is shown on the NIJ & VPAM official website, we guarantee your safety through each of our products.

As the largest ballistic manufacturer in China, V-great has the Beijing based three production facilities of almost 80,000 m² with outstanding production capability and full industry chain from fiber to semi-finished products to manufactured products. With independent R&D center and Tactical Design center, V-great has advanced design capability for new products. With such solid basis, V-great is driven by innovations and strong resolution of continuous improvement of quality control system in order to meet and ever exceed our customers' requirements. Our efforts have been widely recognized resulting in the fact that we were the only Chinese company appointed for the supply of personal body armor products for the UN missions worldwide.

V-great offers a wide range of excellent safety solutions and its certification, according to the most reliable ballistic standards have been highly appreciated even by the most demanding end-users from all over the world. Thanks to many years of constant research and development, our products are considered to be comprehensive body armor products protecting against multi-dimensional threats.

Our mission is to foresee future threats and dangers so that you can be prepared, when they come true. Right efforts make us ready to provide the most accurate solutions at the right time!

To save life - V can!

Multi-layered woven aramid / UHMWPE UD composite matrix

Protection Level

NIJ STD 0101.06 Level IIIA for .357SIG and .44mag

V50 Value

≥ 650m/sec

Performance

Bullet-proof, shrapnel resistance, shock-absorption, fire-retardant

Designed for

Police, Military, Special Forces

MICH HIGH CUT TACTICAL S-XL

Material

Multi-layered woven aramid / UHMWPE UD composite matrix

Protection Level

NIJ STD 0101.06 Level IIIA for .357SIG and .44mag

V50 Value

≥ 650m/sec

Performance

Bullet-proof, shrapnel resistance, shock-absorption, fire-retardant

Designed for

Police, Military, Special Forces

Features

- The retention system consisting of 7 heat sealed durable, breathable and low absorbency memory pads
- Easy adjustable harness with a leather lined chin strap, compatible also with optional 4-points suspension systems: "H" type and "butterfly" type
- Shape of the shell designed for easy usage of headset
- Lightweight construction featuring self-distinguishing properties
- Accessible in MICH/ACH version with integrated night vision shroud, side rails and Velcro tapes allowing to attach additional devices

MICH REGULAR CUT TACTICAL M-XL

Material

Multi-layered woven aramid / UHMWPE UD composite matrix

Protection Level

NIJ STD 0101.06 Level IIIA for .357SIG and .44mag

V50 Value

≥ 650m/sec

Performance

Bullet-proof, shrapnel resistance, shock-absorption, fire-retardant

Designed for

Police, Military, Special Forces

MICH MID CUT TACTICAL M-XL

Material

Multi-layered woven aramid / UHMWPE UD composite matrix

Protection Level

NIJ STD 0101.06 Level IIIA for .357SIG and .44mag

V50 Value

≥ 650m/sec

Performance

Bullet-proof, shrapnel resistance, shock-absorption, fire-retardant

Designed for

Police, Military, Special Forces

4 points “butterfly” suspension

Usage
Used in conjunction with MICH and PASGT bulletproof helmet

Material
Nylon

Color
Black, Military Green, Khaki, Desert Tan

4 points H-back retention and 7 pads

Usage
Used in conjunction with MICH and PASGT bulletproof helmet

Material
Nylon

Color
Black, Military Green, Khaki, Desert Tan

Dial retention and 7 pads

Usage
Used in conjunction with MICH and ARCH bulletproof helmet

Material
Nylon

Color
Black, Military Green, Khaki, Desert Tan

Tactical helmet accessories package

Usage
Used in conjunction with MICH and ARCH bulletproof helmet

Material
Nylon

Color
Black, Military Green, Khaki, Desert Tan

Boltless suspension system

Usage
Used in conjunction with PASGT boltless bulletproof helmet

Material
Nylon

Color
Black, Military Green, Khaki, Desert Tan

4 points mesh crown suspension

Usage
Used in conjunction with MICH, ARCH, PASGT helmet

Material
Nylon

Color
Black, Military Green, Khaki, Desert Tan

BULLETPROOF VISOR

V-RB 001

Item: Bulletproof visor for PASGT, MICH and FAST Helmet

Bulletproof Material
Laminated bulletproof glass: PC+PU+PMMA

Performance
NIJ STD 0101.06 Level IIIA for .357SIG&.44Mag
V50 Value: 760m/s
Dimension: Length: 360mm; Height: 145mm; Thickness: 21.5mm
Weight: ≤1.50kg
Transmittance: 85%
Designed for: Police, Military, Special Forces
Usage: Used in conjunction with bulletproof helmet

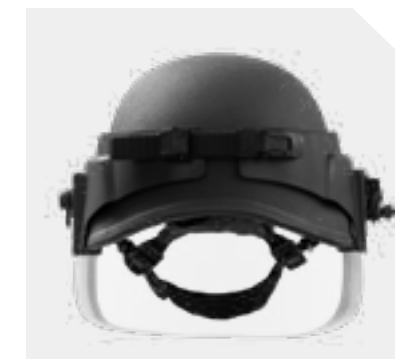

V-BB 001

Item
Bulletproof visor for PASGT and MICH Helmet

Ballistic Material
Laminated bulletproof glass: PC+PU+PMMA

Performance
NIJ STD 0101.06 Level IIIA for .357SIG&.44Mag
V50 Value: 760m/s
Dimension: Length: 360mm; Height: 145mm; Thickness: 21.5mm
Weight: ≤1.50kg
Transmittance: 85%
Designed for: Police, Military, Special Forces
Usage: Used in conjunction with bulletproof helmet

BULLETPROOF SHIELD

V-QRS 001

Design For

Special forces when performing anti-terrorism missions in cities, alley, night circumstances, QRS001 ballistic shield that can not only provide protection effectively, but also be able to take the lead to assault

Features

- Quick release neck collar with dual bungee system
- High Lumen LED lights with light burst
- Aluminium alloy lightweight handle with better grip
- Lower soft armor shield provide extra protection for user's groin and thigh

Technical data

Bulletproof material: Silicon carbide ceramic + PE fiber composite material
 Anti-ballistic performance: NIJ 0101.06 LEVEL IV or 7.62*54R API
 Protected area: 0.32m²
 Hard shield dimension : 880*450±2mm
 Visor dimension : 223*73mm
 Soft shield dimension : 300*400mm±2mm
 Weight: ≤24kg
 Shield color: black, camouflage and other colors can be customized

V-LWS 001

Features

- NIJ 0101.08 Level IIIA or Level III protection
- Lightweight design for easy and rapid motion
- Shooting ports in horizontal or vertical positions
- Contoured shape for added protection
- LED light compatible

Technical data

Ballistic Material: UHMWPE
 Anti-ballistic performance: NIJ 0101.06 LEVEL IIIA or LEVEL III
 Silhouette shape allows for firearm deployment on both shoulders
 Protected area: 0.4787m²
 Viewport: 5*12"
 Weight: 7kg (Level IIIA 600 * 900mm) /
 14.5kg (Level III 600 * 900mm)
 Shield color: black

V-BFS 001

Features

- NIJ 0101.08 Level IIIA protection
- Lightweight design for easy and rapid motion
- Shooting ports in several positions
- Quick release buckle enabling quick and easy doffing
- Aluminum alloy lightweight handle with better grip
- Mesh design for better ventilation

Technical data

Ballistic Material: Hybrid Composite
 Anti-ballistic performance: NIJ 0101.06 LEVEL IIIA
 Protected area: 0.37m² Level IIIA (520 * 770mm)
 0.33m² Level IIIA (500 * 755mm)
 0.30m² Level IIIA (490 * 735mm)
 Weight: 2.85kg Level IIIA (520 * 770mm)
 2.6kg Level IIIA (500 * 755mm)
 2.5kg Level IIIA (490 * 735mm)
 Shield color: Black or customized color

V-BFS 002

Features

- Lightweight design for easy and rapid motion
- Shooting ports in several positions
- Cushion, observation window, strong dazzling light
- Aluminum alloy lightweight handle with better grip

Technical Data

Ballistic Material: UHMWPE
 Anti-ballistic performance: NIJ 0101.06 LEVEL III
 Protected area: 0.28m²
 Weight: 6.5kg
 Thickness: 13mm
 Shield color: Black or customized color

V-BFS 003

Features

- Accessories: left and right hand grips and straps
- Light transmission through the viewing window: $\geq 70\%$
- Connection Strength: The strength of the connection structure between the handle and the body of the bulletproof shield should be greater than or equal to 600N
- Flame retardant performance: The flame duration on the outer surface of the shield should be less than or equal to 10s
- Validity period: 5 years from the date of production
- Lightweight design for easy and rapid motion
- Shooting ports in several positions

Technical Data

Ballistic Material: Shield: 100% PE
 Observation window: bulletproof glass
 Anti-ballistic performance: NIJ 0101.06 LEVEL IIIA
 Dimension: Shield: 900mmx520mm $\pm$ 10mm
 Observation window: 73mmx223mm $\pm$ 3mm
 Protected area: 0.46m²
 Weight: ≤ 7.05 kg
 Shield color: Black or customized color

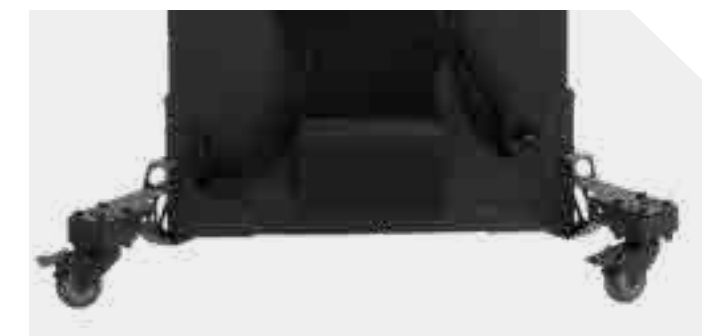

V-MBS 002

Features

- Mobile wheels for easy remove
- High visibility and performance ballistic view point
- Aluminium alloy lightweight handle with better grip
- Foldable framework for easy packing
- Validity period: 10 years from the date of production

Technical data

Ballistic Material: UHMWPE
 Anti-ballistic performance: NIJ Level III+ (7.62*39mm PS & 7.62*51mm NATO)
 Shield Dimensions: Single-side size: 900mm $\pm$ 5mm (H) x 550mm $\pm$ 5mm (W)
 Combination size: 1600mm $\pm$ 5mm (H) x 550mm $\pm$ 5mm (W)
 leg shield sub-shield: 450mm $\pm$ 3mm (H) x 550mm $\pm$ 3mm (W)
 Protection Area: Single-sided shield ≥ 0.45 m²
 Combined ≥ 0.8 m²
 Leg guard sub-shield ≥ 0.24 m²
 Weight: ≤ 28 kg
 Shield color: Black

DEMINING SUIT EOD

V-EOD 001

EOD Suit is designed to offer the maximum protection with the minimum weight making it one of the world's most advanced high-performance cost-effective suits available. The suit is in service in countless countries throughout the world and as such has proved itself operationally on numerous occasions. Our latest Suit Generation aims to be the most comfortable and flexible suit available offering the highest levels of protection against the blast threats

Features

- Quick release system for rapid of removal of suit
- Can be donned quickly without assistance
- Next generation technology offers superior flexibility to weight ratio
- Protect against: Over pressure, shock waves, primary and secondary fragmentation, displacement force, heat, fire and much more

EOD SUIT INCLUDES

- Cooling system and hard-wired communications system
- It consists of trousers, groin protector, jacket, and helmet
- The suit can be integrated with a liquid circulating Personal Climate System that includes a "chiller" refrigeration unit. It pumps water and is efficient for a mission of up to 45 minutes

V-DMS 001

Demining suit is aiming to provide head to toe coverage protection for deminer while in action, which could offer lighter movements than EOD suit and maintain confident protection

Features

- High modular Aramid/UHMWPE solutions for anti-fragmentation system
- High strength fire-resistance Nomex outer shell
- Soft and hard armor attachments available for upgrade of higher protection level according to demand

Demining Suit Includes

- Upper jacket: provides front, back, sides, shoulders and neck protection with optional upgrade of armor plate protection. And high collar design is working with head protection system to provide full coverage protection
- Trousers: provide groin, thigh and shine protection
- Ballistic mine helmet and visor: provide full coverage of head and neck area
- Demining boots: is in function of all terrain with flexibility and comfort for deminer and offer protection against high explosives and blast pressure

Ballistic performance

Demining suit anti fragmentation system could offer in range of 500-650m/s V50 value according to Stanag 2920

Protection Area

Protection Area: 1.2 m²
Chest Range (one round): 90-108 cm

BALLISTIC BRIEFCASE

Ballistic Briefcase

Designed for
Bodyguards, businessman, VIPs

Suitcase Material
Superior synthetic leather

Ballistic Material
Aramid UD / Aramid Woven / UHMWPE UD

Performance
NIJ 0101.06 level IIIA

Features

- Can be used for carrying documents and in an emergency it can be opened to reveal a drop down shield
- Three NIJ IIIA ballistic panels inside providing full body protection against all handguns up to .44Magnum SJHP
- Lightweight construction equipped with flip opening system to ensure quick release
- Superior leather/Nylon with the functions of waterproof, high abrasion resistance, and high tensile strength.
- Pockets on front side for hard armor plate and interior pistol holster for small weapons
- Customized dimension for mission specific

Ballistic Briefcase

Designed for
Bodyguards, businessman, VIPs

Suitcase Material
Nylon 1000D

Ballistic Material
Aramid UD / Aramid Woven / UHMWPE UD

Performance
NIJ 0101.06 level IIIA

Features

- Can be used for carrying documents and in an emergency it can be opened to reveal a drop down shield
- Three NIJ IIIA ballistic panels inside providing full body protection against all handguns up to .44Magnum SJHP
- Lightweight construction equipped with flip opening system to ensure quick release
- Superior leather/Nylon with the functions of waterproof, high abrasion resistance, and high tensile strength.
- Pockets on front side for hard armor plate and interior pistol holster for small weapons
- Customized dimension for mission specific

Ballistic Briefcase

Designed for
Bodyguards, businessman, VIPs

Suitcase Material
Superior synthetic leather

Ballistic Material
Aramid UD / Aramid Woven / UHMWPE UD

Performance
NIJ 0101.06 level IIIA

Features:

- Can be used for carrying documents and in an emergency it can be opened to reveal a drop down shield
- Three NIJ IIIA ballistic panels inside providing full body protection against all handguns up to .44Magnum SJHP
- Lightweight construction equipped with flip opening system to ensure quick release
- Superior leather/Nylon with the functions of waterproof, high abrasion resistance, and high tensile strength.
- Pockets on front side for hard armor plate and interior pistol holster for small weapons
- Customized dimension for mission specific

BALLISTIC BLANKET

Ballistic Blanket

Designed for

Police, Military, Close Protection, Bomb disposal, Demining, Security

Ballistic Material

UHMWPE UD Fabric

Performance

NIJ level IIIA, V50=620 m/s

Features:

- Multi functional and lightweight
- Can be customized to meet the individual specification
- Easily deployable during any threat situation
- Can be assembled as a ballistic wall system with pillar or as a personal shield
- Including 8 carry handles, buckles for quick linking of blankets, and optionally the means to become free standing
- Shoulder straps for aid transportation and interlocking system can be integrated for multiple deployment
- Wide application: amour for cars, boats and aircraft to be instantly protected against incoming bullets and fragments, can become a stretcher to evacuate injured personnel as well as can be transformed into a mobile protective wall for hostage recovery and storming buildings
- Can be customized for different dimensions

Anti-Explosive Blanket

Material: Aramid UD / Aramid Woven / UHMWPE UD

Outer cover: Polyester 1680D

Total weight: 29.5 kg

Sizing: Blanket 1600mm ×1600mm

Outer fence: Height:150mm

Internal diameter: 600mm
weight: 5.80kg

Inner fence: Height: 300mm

Internal diameter: 450mm
weight: 11.30kg

Venting diameter: 300 mm

Features

- Provides protection against explosive damage for people and objects situated near of the center of the explosion
- Wide application including schools, airports, train stations, hotels, restaurants, subways, shopping malls, cinemas and theaters, stadiums and other densely populated public places
- Adopt unique double barrier structures, which can effectively withstand a standard 82-2 grenade (equal to 62g TNT Explosive)
- Ultimate tensile strength larger than 1200N in both the weft and the warp
- Tear strength is larger than 1200N in both the weft and the warp

ANTI RIOT GEARS

V-RG 001

Designed for

Military, Police, Law enforcement agencies and security personnels

Material: Nylon

Performance

V-great professional design provides substantial protection from blunt force trauma without sacrificing the fit or comfort. Upgrade to NIJ 0101 06 level IIIA by using Soft Armor Panels on demand

Features

- The chest, shoulders, and back hard shell panels have a modular flex design allowing for all shapes and sizes to fit comfortably without sacrificing much needed mobility
- Total weight is less than 8 kg
- Antibacterial surface and breathable design with excellent craftsmanship
- The suit ranks highest in easy to put on or take off in a moment
- Suitable for wearer with height 165cm – 190cm through durable straps and nylon elastic
- Protection area includes chest, back, thigh and shin, groin, arm, shoulder and elbow. Chest & groin over 0.1 SQM, back over 0.1 SQM, arms over 0.18 SQM, Legs & feet over 0.3 SQM
- Stronger connection joints strength: Nylon Buckle strength over 7.0 N/cm², Nylon buckle elastic strength over 500N; Connection stripe force is over 2000N 120 Joules energy force strike on any parts of riot suit won't cause break or fragment
- With 100 Joules energy strike on front of riot gear, deformation on backing clay will be under 20mm
- Flame retardant design : the flame would be self extinguished in 10 seconds
- Anti-riot Helmet provides complete head and face protection protective equipment
- Workable temperature: -20 Celsius to 60 Celsius
- Inspection Standard : GA420-2008

V-RG 002

Designed for

Military, Police, Law enforcement agencies and security personnels

Material:

Nylon

Performance

V-great professional design provides substantial protection from blunt force trauma without sacrificing the fit or comfort. Upgrade to NIJ 0101 06 level IIIA by using Soft Armor Panels on demand

Features

- The chest, shoulders, and back hard shell panels have a modular flex design allowing for all shapes and sizes to fit comfortably without sacrificing much needed mobility
- Total weight is less than 8 kg
- Antibacterial surface and breathable design with excellent craftsmanship
- The suit ranks highest in easy to put on or take off in a moment
- Suitable for wearer with height 165cm – 190cm through durable straps and nylon elastic
- Protection area includes check, back, thigh and shin, groin, arm, shoulder and elbow.
- Flame retardant design : the flame would be self extinguished in 10 seconds
- Anti-riot Helmet provides complete head and face protection protective equipment
- Workable temperature: -20 Celsius to 60 Celsius

V-RH 001

Material: ABS shell +PC visor

Visor: convex (not have anti fog feature)

Dimension: Unsize

The thickness of the visor: about 2.5 mm

Head Circumference: 540mm – 600mm

Weight: Maximum 1.8kg

Neck protector: artificial leather

Suspension system

suspension stripes could withstand strength 900N,easily wear on and off

Mitigate shock

with 49 Joules energy strike on helmet, the strength transmits to head should be under 4900N

Penetration: the helmet should withstand 88.2 Joules energy penetration

Flame retardant : the flame should be self extinguished in 10 seconds

Workable temperature: -20 Celsius to 60 Celsius

V-RH 002

Material: ABS shell +PC visor+metal net

Visor: flat (not have anti fog feature)

Dimension: Unsize

The thickness of the visor: about 3 mm

Head Circumference: 540mm – 600mm

Weight: Maximum 1.93kg

Neck protector: artificial leather

Suspension system

Suspension stripes could withstand strength 900n, easily wear on and off

Mitigate shock

With 49 joules energy strike on helmet, the strength transmits to head should be under 4900n

Penetration: the helmet should withstand 88.2 Joules energy penetration

Flame retardant : the flame should be self extinguished in 10 seconds

Workable temperature: -20 Celsius to 60 Celsius

V-RR 001

Item

Anti-riot visor for PASGT, MICH and FAST Helmet

Material

Polycarbonate

Dimension

Perimeter: 364mm; Height: 200mm

Thickness: 4mm / 6.5mm

V50 Value: 200m/s / 270m/s

Weight: 576g / 812g

Transmittance: 93%

Performance

Resist to impact, scratch, splashing and fogging

Designed for

Police, Military, Special Forces

Usage: Used in conjunction with bulletproof helmet

V-BR 001

Item: Anti-riot visor for PASGT and MICH Helmet

Material: Polycarbonate

Dimension: Perimeter: 364mm; Height: 200mm

Thickness: 4mm / 6.5mm

V50 Value: 200m/s / 270m/s64mm

Weight: 576g / 870g

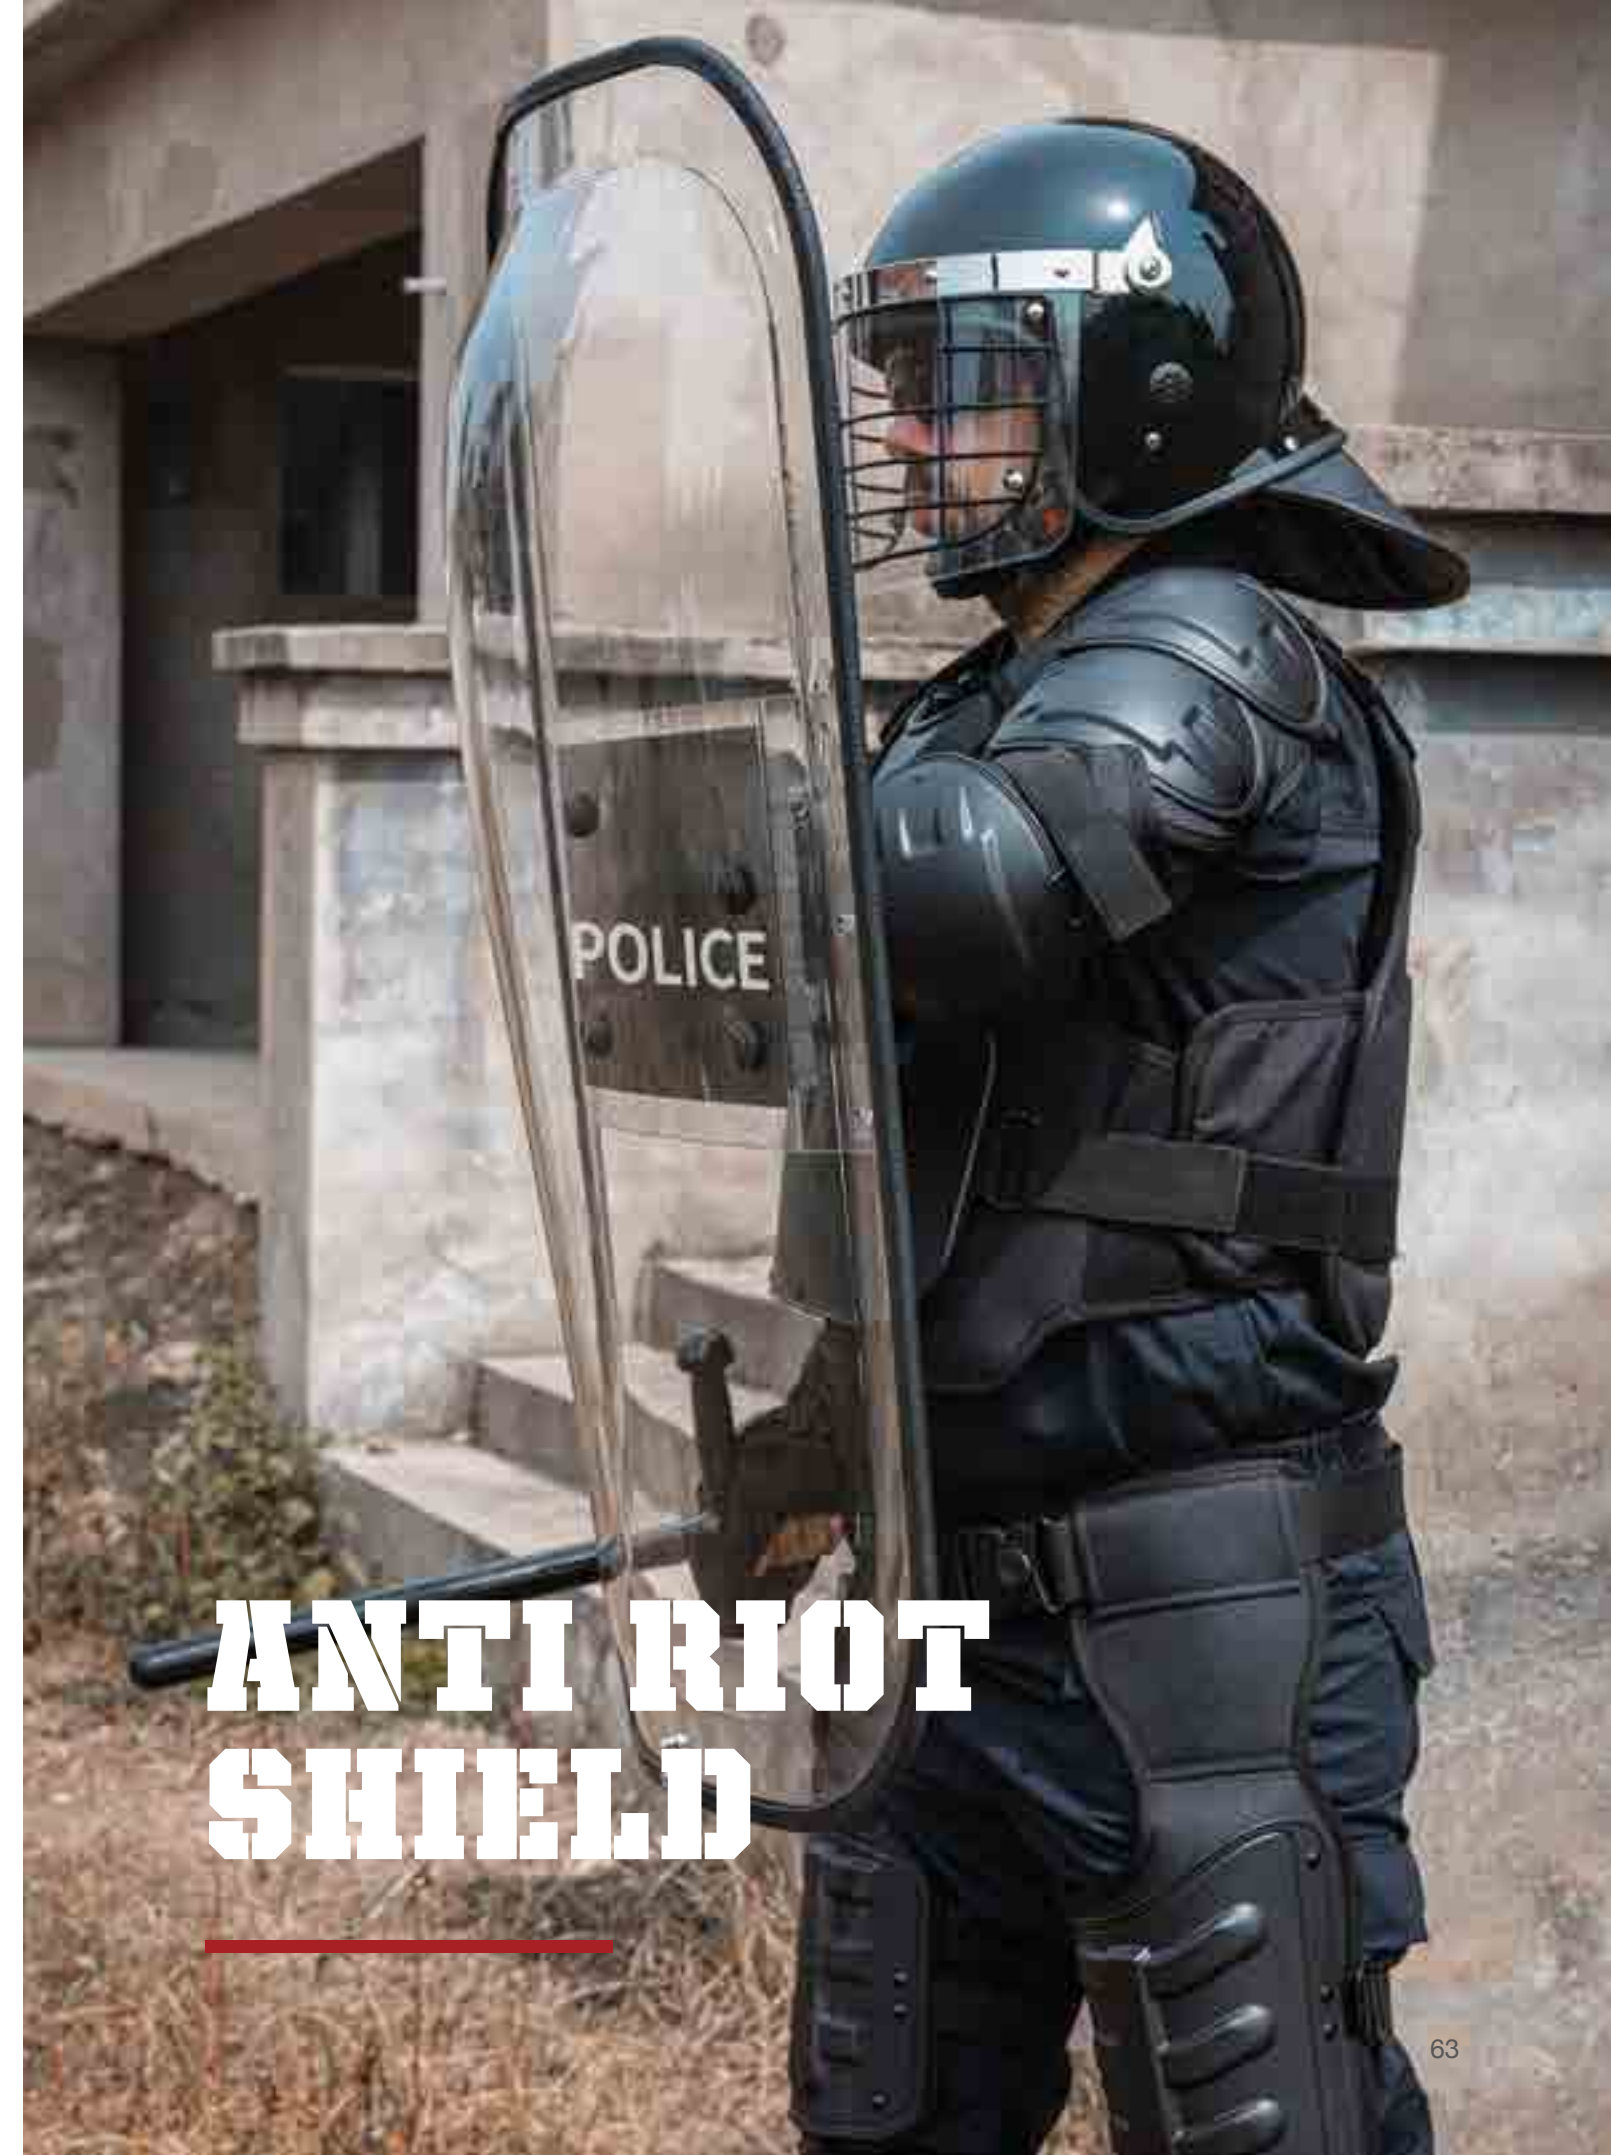

Transmittance: 90%

V50: 891fps or 270m/s

Performance: Resist to impact, scratch, splashing and fogging

Designed for: Police, Military, Special Forces

Usage: Used in conjunction with bulletproof helmet

ANTI RIOT SHIELD

V-RS 001

Material: High-Quality PC Board

Size: Projected Width $\geq 470\text{mm}$; Height $\geq 900\text{mm}$

Weight: $\leq 4.0\text{kg}$

Light transmittance: $\geq 70\%$

Features

- Riot shield can withstand the impact of 147J kinetic energy, after the impact of the force point without penetrating holes or in the force point radius of 50mm outside the penetrative cracking
- The backboard is designed according to the structure of the human body.
- The grip has two handles
- The operation is simple and convenient
- It is safe and effective
- Riot shield's outer surface of the shield body is less than or equal to the time of renewal of the flame 10s
- Temperature adaptability: $-30\text{ }^{\circ}\text{C}$ - $55\text{ }^{\circ}\text{C}$

V-RS 003

Material: High-Quality PC Board

Size: $550 \times 1200 \times 3.5\text{mm}$

Weight: 4.9kg

Light transmittance: $\geq 80\%$

Features

- Structure: shield board and backboard
- The surface of the shield body is smooth
- With the arc design on both sides, the same type of shields or 1.6 combined shields can be put together horizontally and vertically, effectively hindering the attack of dangerous things
- It is designed with double panels
- The backboard is designed according to the structure of the human body
- The grip has two handles
- The operation is simple and convenient. It is safe and effective
- Impact strength: It complies with the standard of the kinetic energy impact of 147J
- Thermal adaptability: $-20\text{ }^{\circ}\text{C}$ - $+55\text{ }^{\circ}\text{C}$
- Fire resistance: After the shield leaves the open fire, the ignited part will only be burned for no more than 5 seconds

V-RS 002

Material: High-Quality PC Board

Size: Projected Width $\geq 470\text{mm}$; Height $\geq 900\text{mm}$

Weight: $\leq 4.0\text{kg}$

Light transmittance: $\geq 70\%$

Features

- Riot shield can withstand the impact of 147J kinetic energy, after the impact of the force point without penetrating holes or in the force point radius of 50mm outside the penetrative cracking
- The backboard is designed according to the structure of the human body.
- The grip has two handles. The operation is simple and convenient. It is safe and effective
- Riot shield's outer surface of the shield body is less than or equal to the time of renewal of the flame 10s
- Thermal adaptability: $-30\text{ }^{\circ}\text{C}$ - $55\text{ }^{\circ}\text{C}$

V-RS 004

Material: High-Quality PC Board

Size: $550 \times 1600 \times 3.5\text{mm}$

Weight: 5.9kg

Light transmittance: $\geq 80\%$

Features

- Structure: shield board and backboard
- The surface of the shield body is smooth
- With the arc design on both sides, the same type of shields or 1.2 combined shields can be put together horizontally and vertically, effectively hindering the attack of dangerous things
- It is designed with double panels. The backboard is designed according to the structure of the human body
- The grip has two handles. The operation is simple and convenient
- It is safe and effective
- Impact strength: It complies with the standard of the kinetic energy impact of 147J
- Thermal adaptability: $-20\text{ }^{\circ}\text{C}$ - $+55\text{ }^{\circ}\text{C}$
- Fire resistance: After the shield leaves the open fire, the ignited part will only be burned for no more than 5 seconds

OUTFITTING

UNIFORM

ACU UNIFORM XS-XXL

Material

65% polyester 35% cotton

Fabric Type

Twill/Ripstop

Features

- Upper sleeve pockets
- Two Velcro chest pockets
- Name tape and patch capability
- Two-channel pen pockets
- Reinforced elbows

UNIFORM

TACTICAL SUIT XS-XXL

The tactical suit with UV blocking characteristic, breathable and moisture wicking mesh panels, provide airflow
This dual fabric combination will keep you running cool&dry in any sweltering environments

Features

- Raglan cut sleeves for improved range of motion
- Velcro panels on each sleeve
- Quarter zip
- Odor resistant
- Anti-static, anti-microbial, and moisture wicking mesh

COMBAT FROG SUIT XS-XXL

Material

94% Cotton 6%Spandex

Fabric Type

Knitted

Fabric Weight

180g/sm

Features

- Raglan cut sleeves for improved range of motion
- Mesh underarm panel to increase ventilation
- Mesh lined collar to prevent unwanted abrasion
- Two sleeve pockets with zipper closures
- Two shoulder patch panels
- Anti-static, anti-microbial, and moisture wicking mesh

UNIFORM

SOFT SHELLLED JACKET XS-3XL

Material

100% polyester Fleece:100% Polyester

Fabric Type

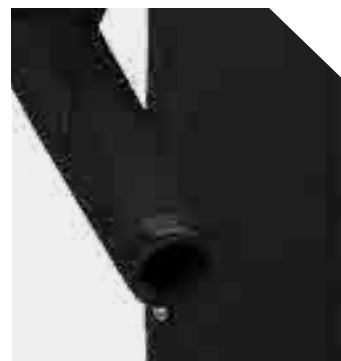

Twill

Fabric Density

310g/sm

Features

- Two internal pockets
- Two shoulder pockets
- Double zipper back pockets
- Drawstring waistband
- Underarm vert zipper
- Double layer reinforced forearm
- Two should patch panels

CHEST RIG Uni-size

Fabric Material

1000D Nylon/Canvas

Features

- Big storage room
- Four point H harness
- Removable DQ buckles
- Attached veries pouches
- Padded cross-back shoulder strap with webbing
- Streamlined design
- Color as customer required

V-JH001

Size:39-46

8.0" Sword & Shadow Police Tactical Boots

- 8-inch QUARTER, imported first layer 1.68mm cowhide leather + 1200D waterproof CORDURA nylon fabric (dynamic waterproof 4 hours, static 15,000 times), imported original YKK zipper on the inside. Anti-bacterial and breathable textile lining. Printed "SWAT" logo on the outside of the heel
- Imported full-function anti-puncture midsole; finished shoes have 1300N anti-puncture function
- Cold-resistant minus 20 degrees 100000 times without cracks
- Tensile force between outsole and upper: >3kg/cm2
- M-PACT cushioning anti-shock insole with anti-bacterial and anti-odor, sweat-absorbing, shock-absorbing foam cushioning technology insole
- Features: head layer cowhide, waterproof, puncture resistant, breathable, good wrapping performance 41# a pair of shoes less than 1.1kg

V-JH002

Size:39-46

Ultralight Breathable Waterproof Tactical Boots

- Upper: imported first layer 2.00mm cowhide punching + new material breathable mesh, all-around breathable
- Soft set of lasted midsole structure + 3E wide last practice, side YKK zipper is easy to put on and take off
- The outsole is rubber sole + MD, wear-resistant, non-slip, cold-proof, anti-corrosion
- Cold resistance: cold resistance of minus 20 degrees 100000 times without cracks
- Tension between outsole and upper: >3kg/cm2
- Insole anti-mold and anti-bacterial moisture wicking + midsole breathable punching
- Features: light, soft, super breathable, less than 1kg for a pair of shoes

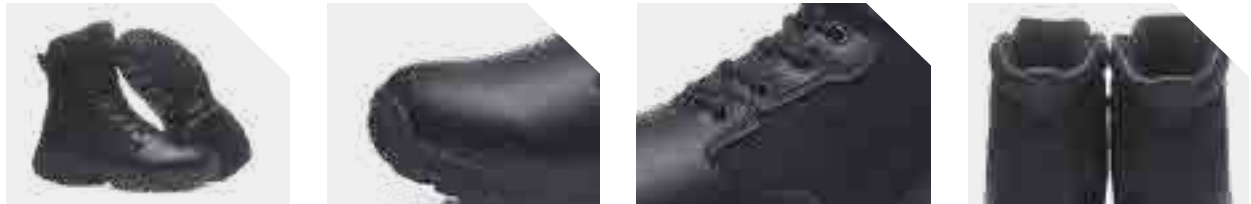

V-JH003

Size:39-46

Waterproof and puncture resistant ultralight tactical boots

- 8" height with inside zipper. The midsole is Kevlar anti-slip midsole, anti-punch 1100N
- Imported waterproof and breathable cowhide (minus 25 degrees 100,000 times zigzag); supplemented by 1200DCordura Cordura waterproof nylon cloth Oxford cloth (Oxford cloth tear-resistant, wear-resistant and anti-scratch)
- Ankle guard ring thickening design, better protection of the ankle; at the same time the heel of the double layer cowhide design, to the Achilles tendon parts of the flexible to provide the best protection
- Tapestry lifesaving laces, non-slip, weight-bearing
- Tensile force between outsole and upper: >3kg/cm2
- The insole is made of anti-mold and anti-bacterial Ortholite. Super comfort. Reduce the fatigue of feet from long hours of hiking training
- Features: ultra-light, waterproof, breathable, good wrapping performance, suitable for four-season duty training wear; 41 # shoes less than 0.8kg

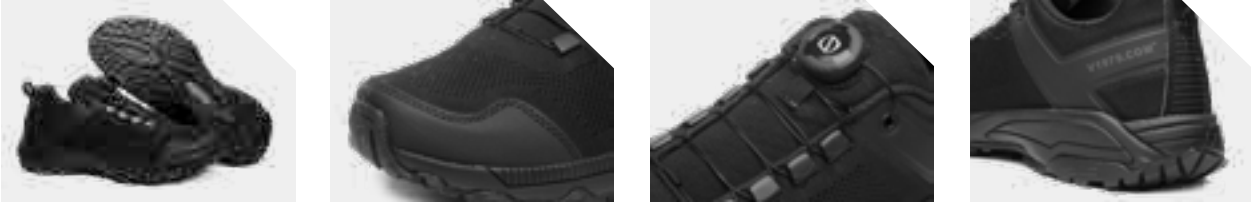

V-JH004

Size:39-46

Self-returning functional duty boots

- 3.5-inch shoe waist
- One-piece weaving with splash-proof function; three-dimensional seamless process of the shoe body, enhanced support, aesthetics
- Diamond pattern anti-kick toe. Imported raw materials with cold-resistant, folding-resistant, hydrolysis-resistant and high peeling function
- Spin-on titanium steel fastener system. Titanium steel rope laces and fasteners lifetime warranty. Wear off quickly
- Imported ortholite insole. Anti-bacterial, anti-odor, comfortable, breathable; shock absorption
- Ultra-light Phylon, containing X-shaped anti-waiver design midsole design; non-slip wear-resistant non-slip rubber sole; soles with anti-oil, wear-resistant, non-slip indicators, non-magnetic and electrostatic reaction; in line with the Ministry of Public Security, the National Footwear Inspection Center, the European SATRA testing and certification standards

V-TG001 M-XL

Material
Mofiber+Rubber

Fabric Weight
500D Nylon

Features

- Half-finger, activities flexibility
- Synthetic leather palm with reinforced padding
- 2-way stretch spandex backhand for flexibility
- Hook&loop cuff closure with molded rubber tab
- Silicon anti-slip finger tips to maximize grip
- Terry cloth sweat wipe on thumb

V-TG002 M-XL

Material
Mofiber+Rubber

Fabric Weight
500D Nylon

Features

- Synthetic leather palm with reinforced padding
- 2-way stretch spandex backhand for flexibility
- Hook&loop cuff closure with molded rubber tab
- Silicon anti-slip finger tips to maximize grip
- Terry cloth sweat wipe on thumb

V-KEP001

Product Name
Knee&Elbow Pads

Material
Nylon and Polymer

Fabric Weight
180g/sm

Size Elbow
14*17cm Knee 17*20cm

Feature

- 0.5" density foam padding
- Non-slip rubber cap
- Dual velcro fastener
- Good protection for elbow and knees

V-KEP002

Material

Nylon and Polymer

Fabric Weight

180g/sm

Size Elbow

10*22cm Knee 16*26cm

Feature

- 0.5" density foam padding
- Easy to insert into the combat suit
- Very comfortable ware feelings
- Good protection for elbow and knees

V-BC001

Material

65% polyester, 35% Cotton

Fabric Weight

210-220g/sm

Size: Adjustable

Color: Customized

Feature

- Multiple colors available
- Adjustable strap with metal buckles
- Velcro panels for the patches

EMERGENCY EQUIPMENT

V-XFK 001

Description

The fire helmet is composed of helmet shell, mask, shawl, cushioning layer and other parts. Communication system, with obvious reflective logo. The helmet visor is with anti-fog performance, and the surface is anti-abrasion and scratch-proof. The chin strap can be adjusted and the chin strap can be adjusted to fit people of various head shapes. Electroplating process can be used on the outside of the helmet to effectively reflect radiant heat, to ensure that the wearer in the rescue site is not harmed by heat radiation.

Features

- Excellent protection against falling objects
- Flame-retardant shell, high temperature resistant
- Comprehensive protection for the head, ears and back of the head
- Multi-level internal and external adjustment, suitable for all head shapes
- Soft suspension is comfortable to wear

V-JYK 001

Description

The helmet is a multi-purpose rescue helmet with a half-face design, with distinctive reflective marks, and is suitable for different purposes in various professional activities. It can be used for firefighters' forest fire rescue, highway traffic accident rescue, first aid operations, natural disasters or structural accidents (building collapse), site cleaning, and other emergency rescue operations for head protection. It is resistant to sharp objects, corrosion, heat radiation, reflective, insulating and lightweight.

Features

- Streamlined half-helmet design for a stable fit
- High impact resistance and excellent ventilation performance
- Excellent UV and corrosion resistance
- Optional explosion-proof flashlight and communication system
- Light weight, suitable for different workplaces

V-FHF 001

Description

The fireman protective suit is composed of four layers of materials including a fireproof surface layer, a waterproof breathable layer, a heat insulation layer and a comfortable inner layer and it is used in protecting the body and limbs of fireman and it is. The properties of the protective suit are flaming retardant, waterproof and breathable, heat insulation, anti-static and strong marking. The suit is designed to meet the protection needs for the fireman in fire and rescue complex environments with excellent comprehensive protection performance. The insulation layer, in conjunction with the thermal protection of the top layer, further enhances the garment's protection against high radiant heat from the fire as well as convective heat. The lining material is flaming retardant and non-melt dripping, comfortable and soft.

Features

- Fire resistance, heat resistance, thermal insulation and toughness
- Prevent chemical substances from damaging the skin
- Full body protection with high safety
- High heat dissipation and easy to discharge body heat

V-YJF 001

Description

The emergency rescue suit is anti-static, flame-retardant and wear-resistant. And it is a special suit worn by fireman for emergency rescue operations. It provides protection for the torso, neck, arms, wrists and legs. It is made of double knitted flame-retardant structural material, the main components are aramid fibers and conductive fibers, which have the properties of anti-static, flame-retardant, light, and strong tensile strength. The surface of all hard accessories of the rescue suit is smooth, without burrs and sharp edges. After the thermal stability test, the sewing thread has no melting or shrinkage. Suitable for rescue workers in the rescue of building collapse rescue in the city, restricted space rescue, machinery and equipment accident rescue, ditch rescue, rope rescue and other sites to carry out operations when wearing protective clothing.

Features

- Strong flame-retardant performance, continuous burning time 0s, no molten dripping
- After the thermal stability test, the sewing thread has no melting or shrinkage
- High-strength shoulder pads can effectively protect the shoulder joints
- Reflective material is used to improve nighttime visibility and safety
- Versatile detail design

V-SJLD 001

Description

Two-dimensional positioning radar life detector is a low-frequency ultra-wideband MIMO architecture life detection radar, which is suitable for rapid biological search and positioning tasks at disaster sites such as earthquakes and landslides. The device has the advantages of strong penetrating ability and strong real-time positioning ability for ruins. The two-dimensional coordinate information of multiple trapped human targets in the detection area can be obtained at the same time, which is conducive to the precise rescue of on-site rescue. It can be widely used in search and rescue missions in firefighting, search and rescue teams, earthquakes, civil defense, electric power, petroleum, petrochemical and other industries.

Features

- Strong penetration ability of complex media such as ruins
- Multi-target real-time two-dimensional positioning capability
- Strong adaptability to environment
- Able to detect all static body cardiopulmonary exercise
- Detect and display the moving targets on real time

V-CQLD 001

Description

It is a 3D Imaging through wall radar, majored for gathering real-time and accurate intelligence of live objects from behind solid walls or barriers to help the mission executor determining the necessary tactical planning with crucial information including life presence of both moving and static target, target location, target numbers, target moving path, internal structure of the building. It delivers mission-critical information when and where it is needed, providing unprecedented situational awareness, which can effectively reduce the risk of casual-ties of combat personnel, conduct tactical assaults, and improve the combat mission's success rate. It is applicable for a variety of emergency search and high-risk combat mission carried by police, armed forces, law enforcement agencies, search and rescue organizations, etc.

Features

- 3D imaging and intelligent situation perception
- High real time detection & display
- Detect live object behind wall/barrier of common construction material
- Wireless remote control and display for stand-off operation
- Indoor layout mapping
- Real-time storage and recording of detection data

V-DPTC 001

Description

It is a new generation of portable explosives and narcotics detector. It adopts high-resolution ion mobility spectroscopy technology, with fast detection speed and high precision. Simple operation, low false alarm rate, easy to distinguish dangerous types, low power consumption, small size, light weight, easy to carry, easy to maintain, use environment and strong adaptability, can accurately detect black powder and international All explosives and drugs prescribed by ICAO.

Features

- Positive and negative dual mode to achieve the two-mode detection of explosives and narcotics
- One-touch detection, simple operation
- Get detection and analysis results in 3 seconds
- Automatic calibration function, to adapt to a variety of environmental changes
- Open database, sample library information upgraded any time
- Consumables cheap, easy to replace

V-CBRN 001

Description

The protective clothing made of lead-free flexible radiation shielding composite material and AFPRRU impregnated and strengthened wear-resistant treatment can effectively protect common military poisons such as mustard gas, acids and alkalis and other chemicals, radioactive dust and infectious media. The seams of the clothes are made of double-layer liquid sealing technology, which has good sealing performance. It is suitable for on-site disposal and emergency rescue personnel in dangerous environments such as nuclear radiation hazards, nuclear, biological and chemical terrorist crises, nuclear aerosol pollution, and radioactive pollution.

Features

- Good flame-retardant properties
- Effective protection against X, γ , β rays and other ionizing radiation and radioactive aerosols
- Respiratory protection system can effectively filter a variety of military poisons, chemical gases, poisonous smoke and methyl bromide
- The mask window with shielding protection performance
- Low temperature resistance at - 40°C

V-CBRN 002

Description

The fully-sealed nuclear, biological and chemical contamination protective clothing adopts flame-retardant and chemical-resistant mixing materials (Grrid_PNR), which has good protection performance against nuclear, biological and chemical pollution from acid-based chemicals, infectious media, and nuclear aerosols. Respiratory protection systems can effectively protect against military poisons, poisonous gases, smoke, nuclear aerosols, and inorganic gases and vapors. Extended airtight zipper, removable glove loops. Sewn with flame-retardant aramid thread, liquid-tight finish. The whole set consists of: nuclear, biological and chemical contamination protective clothing, anti-virus and anti-chemical gloves, nuclear, biological and chemical protective boots, gas mask, nuclear, biological and chemical canister, suitcase.

Features

- Side-entry full-body airtight design
- The entire set is directly washable
- Portable suitcase storage, convenient for vehicles, field rescue and other complex environments
- Sewing with Cut Resistant Flame-Retardant Aramid Thread
- The entire garment is sprayed liquid-tight

VEHICLE

ARMORED VEHICLE

Description

The armored vehicle adopts the 4×4 reinforced special chassis of the American Ford F-550 military and police vehicle, six-sided bulletproof body, protective rotating turret and various special equipment. The armored design of the vehicle has a strong sense of deterrence, and its bulletproof performance meets the B-level requirements of the Ministry of Public Security "General Technical Conditions for Police Anti-riot Vehicles". It can resist the attack of 56 submachine gun steel core bullets; Off-road capability; the 5-door layout design of the whole vehicle greatly improves the quick response of combatants and has strong practicability. It is an ideal armored personnel carrier for military and police.

Features

- Six sides bullet-proof, with the 4.0mm bullet-proof steel
- Crash bumper
- Automatic fire extinguishing system for engine cabin
- Shooting holes
- Anti-riot tires
- Vehicle warning system
- Electric step stool

ARMORED TROOPS CARRIER

Description

The Armored Troops Carrier adopts special Chinese Dongfeng 4X4 chassis. The whole vehicle has 6.5mm bulletproof body, 39mm PC type bulletproof glass, and various police equipment such as alarm lights, sirens, color changing strobe lights, square alarm lights.

The vehicle has strong deterrence and anti-elasticity, which has strong power, good mobility and strong off-road ability. The V Shape Hull design modified to resist mines, simple explosives and other threats. The vehicle layout design with 3 doors and 10 windows, has greatly improved quickly reaction of the fighters and strong practicability. It's special anti-terrorism assault vehicle for the army and police.

Features

- Six sides bullet-proof, with the 4.0mm bullet-proof steel
- Crash bumper
- Automatic fire extinguishing system for engine cabin
- Shooting holes
- Anti-riot tires
- Vehicle warning system
- Electric step stool

WATER CANNON TRUCK

Description

The anti-riot water cannon truck is rebuilt on the basis of a truck chassis, equipped with functional systems such as high-pressure water cannon, self-protection, roadblock removal, camera monitoring, broadcast publicity, safety warning, and reversing monitoring. At the same time, according to the needs of users, optional pulse water cannons, glass and lamp protection nets, strong lighting systems, communication command systems, etc., are advanced equipment for quelling non-permanent damage in group riots in modern society.

Features

- High Strength Hydraulic Wrecker Shovel
- Independent auxiliary engine
- DC riot water cannon
- Vehicle sprinkler system
- Mixed media include coloring agent, pepper water, gas liquid, firefighting foam, etc
- Water cannon electrification control system
- Vehicle warning system
- Vehicle glass protective net

ANTI-TERRORIST ASSAULT VEHICLE

Description

The anti-terrorist assault vehicle can transport 10-16 commandos. The assault truss can be quickly extended to form a climbing slope, and the combatants can quickly climb to a certain height. The main functions are high-altitude breakthrough, hostage rescue, obstacle boarding, rapid disaster response, anti-hijacking, etc. The whole vehicle is multi-functional and has many advantages such as quick response and flexibility.

Features

- Combat team members can be sent to the 2nd and 3rd floors at the same time
- Including baffles, emergency ladders, etc
- Camera monitoring
- Removable legs
- Vehicle warning system
- High altitude sniper

ARMORED PERSONNEL CARRIER

Description

The armored personnel carrier is an all-weather, high-mobility armored personnel carrier. The body, glass and tires are all bulletproof. After testing, the Tiger armored personnel carrier can withstand the violent shooting of small arms bullets. Using a 4×4 chassis, this special armored personnel carrier can carry combat personnel at a speed of 110 km/h, and is flexible and maneuverable.

Features

- Ballistic protection for the entire vehicle
- Safe Troop Carrier
- Square light warning security system
- Vehicle-mounted special strong light search lighting system
- Vehicle-mounted PTZ camera monitoring

VEHICLE

FIREFIGHTING VEHICLE

Description

The vehicle has a compact structure, complete equipment, and strong mobility. It can respond to fires in enterprises, communities, or key firefighting units in a timely manner. It can immediately form a small combat force for initial firefighting and personnel evacuation. It can be widely used in fire rescue stations, government full-time fire brigades, enterprise/chemical industrial park full-time fire brigades, factories, mines, communities, docks and other places to fight general material fires.

Features

- Strong power and good maneuverability
- Easy to operate, long-range capability
- Adopting high quality steel, durable
- Reasonable arrangement of the whole vehicle, easy access to equipment
- Good safety, low failure
